For Faster and Better Ironing---
Hotpoint **Super-Automatic Electric Iron**

Know the joy of having just the heat you want automatically maintained while you iron.

No more watching, no guesswork. No waiting for the iron to heat up or cool down. Just set the heat control at the desired temperature and that heat will be maintained indefinitely. You can have various degrees of low heat for beautiful lingerie and sheer silks; the desired degree of medium heat for handkerchiefs, shirts and wash dresses; high heat for heavy, damp table linens; or any heat in between. When you have finished ironing one piece and stop to fold and lay it aside—you don't need to pull out the plug. Just roll the iron back on its heel stand. It will stay at just the right temperature to start in on another piece of the same kind. It is the same with the many other little interruptions that are bound to occur during any half day's ironing—answering the doorbell, the telephone, putting on the children's wraps. When you return, you can start right in ironing without losing a minute waiting for your iron to heat up or cool off. And you have the added satisfaction of knowing that, during the interruption, the current has been on only a small fraction of the time.

The Hotpoint SUPER-AUTOMATIC Iron will make your ironing day easier and shorter and you will have the pride and satisfaction of work beautifully done.

DURING JUNE ONLY
You can get this Hotpoint Super-Automatic Iron for **\$8.80** CASH OR TERMS

We give you a **\$1.00** allowance for any old iron.
