Money is not Wealth-But

When stored in the banks of the country, forms a basis of credit that is of material advantage to you and the community in which you live. The money which is held in hiding or carried in the pocket is of no benefit to any one. One might as well expect returns from the iron and copper ore or gold nuggets stored in the depths of the earth. It is said that statistics show that if all the unnecessary money carried in pockets were properly invested the returns therefrom would pay all of our taxes.
