Another Fish Story. "How is it?" asked an Englishman of an American friend, "that the Yankees get on well in business, while many Englishmen fail?" "Brains, my boy!" was the reply. "You should eat more fish. Give me five dollars and I'll get you some of the fish my wife gets for me."

The Englishman parted with his five dollars and the fish was sent to him. Next day he met the Yankee again. "How did you get on?" the Yankee asked. "Well, it was splendid, fish!" "Did you feel any different?" "No, I can't say I feel any different," said the Englishman, "but five dollars was a lot for a piece of fish."

"There you are," said the Yankee. "Your brain is beginning to work already." -Ex.

She Found an Old Savings Account Book

A friend of our presented a pass book laid away and forgotten for years. Although it only showed a deposit of \$10, the accumulated interest brought the amount to her credit to nearly \$20. This shows how even a small amount left in a bank over a period of years can double itself with no effort on the part of the depositor.

And with the initial deposit being added to all the time and the compound interest being added to the principal, a savings account can very rapidly grow to large proportions.

A Nest Egg Home Bank for Every Depositor It is yours when you make an initial deposit of \$1 or more.

Attractive, strong handsomely nickled; everybody who sees it wants it. And it is a big help in building up a savings account.

A Limited Quantity of Nest Eggs Left To those who will come at once we can still supply a Nest Egg Home Bank.
