LUMBER IS NOT HIGH

Recent reliable statistics show that now is the time to build. If you have been laboring under the impression that lumber is high, we invite you to carefully study the following:

	Percentage of Increase Since 1914
Copper	114 per cent
Metals (26 grades)	106 per cent
Wheat	94 per cent
Beans	74 per cent
Gasoline	67 per cent
Corn	50 per cent
Hogs	46 per cent
Oats	22 per cent
Lumber	15 to 18 per cent
Labor	12 to 15 per cent

If you are going to build, no better opportunity in your life will ever come than right now.

Take a look at the above statistics and you will immediately begin to realize why labor make up from 3-4 to 9-10 of the total cost of your building. Both are at a comparatively low level.

Don't be fooled into believing that lumber is either "scarce" or "high."

It is neither! It never could be bought to better advantage than right now. Our guaranteed material saving plans are prepared by expert architects. We can fit your ideal building to your pocketbook.

The Tum-A-Lum method does it.

The present low level cannot be maintained long. Exports are practically shut off now, but as soon as the war ends, billions of feet will be demanded by every warring nation at once. The cost of building will naturally go up in the U. S. and will probably reach a high point for years while the reconstruction in Europe is taking place.

Don't wait for the high point.

Build now while it is possible to build cheaply, even if you have to sell when the high point comes.

This is the year to build, and the earlier in the year you buy the more you will save.

Thousands of buyers have lot money by not buying in January or February. Get in now while the price is still low.
