Buy a Liberty Loan Bond

Liberty Loan Bonds are the safest investment in the world today. They are issued by the United States Government and are a mortgage on the United States of America—our country—the richest country in the world. They are Uncle Sam's promise to pay, and he is worth \$225,000,000,000.

Liberty Loan Bonds pay 3 1-2 per cent interest and they may be had in any of the following denominations: \$50, \$100, \$500, \$1000, \$5000, \$10,000, \$50,000 and \$100,000. You can make a payment as low as one dollar and have until August 30 to pay the balance. Many business houses accept bonds as cash.

A MESSAGE FROM SECRETARY W. G. M'ADDO

"Wars cannot be conducted without money. It is the first thing to be provided. In this war it is the most immediate help—the most effective help that we can give. We must not be content with a subscription of two billion dollars—we must oversubscribe the loan as an indication that America is stirred to the depths and aroused to the summit of her greatness in the cause of freedom. Let us not endanger success by complacent optimism. Let us not satisfy ourselves with the reflection that some one else will subscribe the required amount. Let every man and woman in the land make it his or her

business to subscribe to the Liberty Loan immediately, and if they cannot subscribe themselves, let them induce somebody else to subscribe. Provide the Government with the funds indispensably needed for the conduct of the war and give notice to the enemies of the United States that we have billions to sacrifice in the cause of Liberty. "Buy a Liberty Bond today; do not put it off until tomorrow. Every dollar provided quickly and expended wisely will shorten the war and save human life."

Produce Infertile EGGS

Infertile Eggs Keep Best and Market Best in Summer Heat Fertile Eggs Spoil Quickly in Summer Heat

Fertile Eggs Cost the Farmer an Enormous Sum Each Year in Loss

Farmers lose millions of dollars annually from bad methods of producing and handling eggs. One third of this loss is preventable, because it is due to the partial hatching of fertile eggs which have been allowed to become warm enough to begin to incubate.

The rooster makes the egg fertile The fertile egg makes the blood ring

You can save the money now lost from blood rings by keeping the male bird from your flock after the hatching season is over.

The rooster does not help the hens to lay. He merely fertilizes the germ of the egg. The fertile germ in hot weather quickly becomes a blood ring, which spoils the egg for food and market. Summer heat has the same effect on fertile eggs as the hen or incubator.

Infertile Eggs Will Not Become Blood Rings

After the hatching season cook, seal or pen your rooster. Your hens not running with a male bird will produce infertile eggs—quality eggs that keep best and market best.

Rules for Handling Eggs on the Farm

Heat is the great enemy of eggs, both fertile and infertile. Farmers are urged to follow these simple rules, which cost nothing but time and thought and will add dollars to the poultry yard returns:

1. Keep the nests clean; provide one nest for every four hens.
2. Gather the eggs twice daily.
3. Keep the eggs in a cool, dry room or cellar.
4. Market the eggs at least twice a week.
5. Sell, kill or confine all male birds as soon as the hatching season is over.

Valuable published information on the raising and care of poultry and eggs and individual advice on these subjects may be obtained by writing to the Bureau of Animal Industry, U. S. Department of Agriculture, Washington, D. C.
