KEEP COLTS GROWING

Important Consideration in Producing Horses Profitably.

Good Horseman Endeavors to Reduce Worrying and Fretting of Young Animal to Minimum—Grain Must Be Supplied.

(By H. H. McCarty, Indiana Experiment Station.)
To keep the cold growing without interruption during weaning time and afterward is a most important consideration in producing horses profitably. A good horseman aims to replace the milk that the colt has been accustomed to secure from its mother. He tries also to reduce the worrying and fretting of the colt to a minimum. To wean a colt appears to be a simple matter. It is simple as many do it; yet the very low degree of success that is shown on many farms by their anfrictive colts is evidence that there is something wrong or that there is something lacking. Often in a few weeks during weaning time the youngster changes from the growing, sleek, milk-fat colt to a stiff-haired and unthrifty, stunted individual. The colt, if properly cared for, need lose but little of his flesh, bloom and spirit.

Feed Some Grain.
Grain must be used as the milk is taken away. It is necessary that the colt have been taught to eat grain before weaning is attempted. Oats have always been preferred by horsemen for young colts. They are undoubtedly superior to any other single grain. The colt likes a mixture or a variety of grains and will thrive best on such a ration. He relishes corn, and it may well be fed as part of the grain ration. It may be said that corn contains a rather high percentage of fat. True, it does, and so does milk, which is as nearly ideal food as nature can make. Corn should not be fed alone, nor in too great quantities. Bran is a splendid feed and contains material for bone and muscle. A mixture of oats 60 per cent, corn 30 per cent, and bran 10 per cent makes a ration that will enable any colt to grow rapidly. A handful of oilmeal may be profitably added. Then he will be more likely to eat enough to almost make up for the lack of milk.

Provide Hay.
Hay should be provided in plenty. Doubtless alfalfa or clover is the most desirable for young growing colts. Both grain and hay should be of the very best quality. If it is at all possible to furnish succulent grass for the colt it should be done. This is a big factor in preventing any check in the growth of the youngster.

ROW MARKER IS CONVENIENT

Handy Device Perfected by Illinois Man to Trace Three Straight Lines—Easily Made.

A very handy marker that will trace three straight row lines at a time has been perfected in Illinois. It can be easily made by the farm carpenter who has a few tools. A single horse is hitched to it by the shafting. It may

A Row Marker.

be used in fields, in gardens and in truck patches and wherever straight rows are necessary. A study of the illustration will show how it is constructed. The three "sleds" should be placed equally distant and at the right space intervals to mark rows of the width that are wanted.

HOW TO PRUNE BLACKBERRIES

Better to Leave Some Varieties Until Blossoms Bud—Set Eldorado and Minnewaska in Fall.

In the cultivation of blackberries the preference is for low pruning, but some varieties show lack of uniformity in their manner of bearing fruit. At times most of it will be found close to the main stalk, and at other times it will be well out on the laterals. It is better to leave such varieties until the blossom buds show before pruning in order to gauge the amount of fruit which should be produced.
Wilson's Early sets fruit buds thickly near the base of the laterals, and should, consequently, be pruned closely on the side growth. Early harvest requires a longer pruning of the laterals. Eldorado and Minnewaska are good kinds. Plant in fall.

EFFICIENT WORK FOR HENS

They Must Be Furnished With Sanitary Quarters, Good Food and Keep Regular Hours.

Hens are much like people, after all. In order to do efficient work they must have sanitary quarters, good food, and keep regular hours.
Hens are easier to manage than people, though, because they always are glad to co-operate with you if you give them a chance.

Perfected.

After one year of experimenting in my laboratory, I have perfected a Porcelain and Cast Gold Inlay Crown for bridge attachment which is so superior to the Gold Crown or the Gold Band and Porcelain Crown, that it gives me pleasure to demonstrate the technique of making it to other Dentists.

Fortunately, I have enough Imported German Novocain to last me over one year. I can now absolutely promise to work on your teeth without pain. It is the most wonderful synthetic substitute for Cocaine ever used by the Dental Profession. Dr. Eloy T. Hedlund, Dr. L. Bogan, Dr. S. S. Skiff, Dentistry, "Not the cheapest but the best."

A New FREE If They See
Beverage of Imitations. Look for the Two Horses on the Label.
Made by Levi Strauss & Co., San Francisco
Awarded GRAND PRIZE at the P.P.L.E.

OUTLINE OF LITTER CARRIER

Device Holds Big Load and Dumps Automatically by Reversing Horse—Handy in Stable.

Here is an outline of a litter carrier sketched from the plan of the one I use. This is a very simple device, but it has more merit than one could imagine, writes J. W. Batchelor of Yankton county in Dakota Farmer.

The slats are 1 by 4 inches and are bolted to the chain with 3/4 by 2-inch bolts. The first slat behind

Handy Litter Carrier.

the eveners is a 2 by 4 to maintain spread, and bored for the chain. A light log chain about 16 1/2 feet long is needed for a carrier this size—5 feet wide by 6 feet long.

This carrier is easy to load, will hold a big load, and dumps automatically by reversing horse, the carrier rolling until it is bottom-side up. When not in use it can be rolled up and made to occupy but little space. It is invaluable for cleaning a stable that has a wide door and level floor.

VARIETIES OF HORSE-RADISH

Maliner Kren or Bohemian Are Considered Superior—Time For Planting Is in Spring.

The best variety of horse-radish is the Maliner Kren or Bohemian. The root cuttings can be had from any of the leading seedsmen. The cuttings are made cut straight across at top and sloping at the lower end, so that it is easy to distinguish between them in planting.

The time for planting is in the earliest spring, and the early cabbage plantation is one of the best places. Punch holes in the rows mid-way between the cabbage plants with a crowbar and put the root cutting in perfectly straight. Then, after the cabbages are cut, the horse-radishes are cultivated through the season. An application between the rows of 150 pounds of nitrate of soda per acre will promote the rapid growth of the roots.

The crop is dug in late fall and the roots trimmed, the side roots cut properly and buried in bundles for the winter, and the main roots put on the market. The roots are at their best at one season's growth, and will decrease in value if left longer. The main roots are sold by the ton usually.

RIGHT ROUGHAGE FOR SHEEP

Alfalfa or Clover Hay Contains Large Amounts of Protein Which Balance Carbonaceous Grains.

Sheep are ruminant animals and in the main will use the same kind of roughages that are eaten by cattle. Either alfalfa or clover hay makes the very best roughage for sheep, since they are both palatable to them and contain a relatively large amount of protein which balances the more carbonaceous grains commonly fed. Sugar cane or sorghum and millet are both distinctly carbonaceous roughages, and if used for sheep feeding, either breeding flocks or in fattening sheep for market, must be supplemented with some concentrate rich in protein such as linseed oil or cottonseed meal.

Ordinarily either of these concentrates need not compose to exceed 10 per cent of the total grain ration. The millet is not so much in favor with sheep feeders, because of the fact that unless it is cut at exactly the right time it is liable to produce scours. A good quality of millet, however, cut early, will form a fit roughage for sheep if properly supplemented with either some additional roughage rich in protein, like alfalfa or clover, or grain rations with a protein supplement.

POISON GOPHERS AND MOLES

Best Time for Work Is in Spring and Early Summer—Use Strychnine With Utmost Care.

Spring and early summer is the best time to get rid of gophers and moles. For early spring poisoned corn is good bait. Place some of it out early in April, some more about May and a third lot a little later. Poisoned corn may be prepared by soaking for 21 hours in a solution made by dissolving strychnine in water at the rate of about one-tenth ounce to the quart.
Where the pests are unusually bad at planting time, seed corn can be treated in this way without injuring its germinating qualities. Of course the planter will have to be regulated to drop this soaked corn.
Strychnine is deadly poison. It should be handled with extreme care and both the solution and the soaked corn kept out of the way of children and animals.

Prolonged It.
Two English workmen were discussing the war.
"It'll be an awful long job, Sam," said one.
"It will," replied the other.
"You see, these Germans is takin' thousands and thousands of Russian prisoners, and the Russians is takin' thousands and thousands of German prisoners. If it keeps on, all the Russians will be in Germany and all the Germans in Russia. And then they'll start all over again, fightin' to get back to their 'omes."—Tit-Bits.

True to His Promise.
"William, when we were married you promised to stop smoking."
"So I did, my dear. You will remember that I said to you, holding up three cigars I had in my pocket, 'As soon as I smoke these, I'll quit.'"
"Well, you haven't kept your promise."
"Oh, yes, I have. You see those three identical cigars are still unsmoked. I have them in my desk."—Boston Transcript.

Change.
The Old Man—See here! You've spent \$1,200 this semester and your report shows overcuts in every subject. This state of affairs can not continue and I want to know right now if there's to be any change?
The Young One—Well, I have 30 cents with me now.—Pennsylvania Punch Bowl.

The More Desperate Chance.
"Slaxon got married rather than fight for his country."
"And yet," murmured Miss Cayenne, "some people accused him of being a coward!"—Washington Star.

It Works! Try It
Tells how to loosen a sore, tender corn so it lifts out without pain.

No humbug! Any corn, whether hard, soft or between the toes, will loosen right up and lift out, without a particle of pain or soreness.

This drug is called freezone and is a compound of ether discovered by a Cincinnati man.

Ask at any drug store for a small bottle of freezone, which will cost but a trifle, but is sufficient to rid one's feet of every corn or callous.

Put a few drops directly upon any tender, aching corn or callous. Instantly the soreness disappears and shortly the corn or callous will loosen and can be lifted off with the fingers.

This drug freezone doesn't eat out the corns or callouses but shrivels them without even irritating the surrounding skin.

Just think! No pain at all; no soreness or smarting when applying it or afterwards. If your druggist don't have freezone have him order it for you.

Her Penalty.
He—Does your father object to my staying so late?
She—No; pa says it serves me right for being in when you call.—Boston Transcript.

Shortage.
The man who likes to speak his mind Occasion off will seek.
And when he gets a chance may find He hadn't much to speak.
—Washington Star.

Dr. Pierce's Pleasant Pellets are the original little liver pills put up 40 years ago. They regulate liver and bowels.

Just the Thing.
"Where can I learn to be an expert on tea?"
"I suppose a samovarist would be the idea for you."—Louisville Courier-Journal.

His Extravagance.
"Do you believe that time is money?"
"Yes."
"I thought so. It's about the only thing you ever spend."—Detroit Free Press.

Chestnuts Can.
Jokes can't really be cracked. Then why do they speak of cracking a joke?
I suppose because so many of them are chestnuts.—Exchange.

"They're very patriotic."
"Very. They're even going to plant potatoes in their window boxes this spring instead of geraniums."—Detroit Free Press.

HAVE DARK HAIR AND LOOK YOUNG

Nobody can Tell when you Darken Gray, Faded Hair with Sage Tea.

Grandmother kept her hair beautifully darkened, glossy and attractive with a brew of Sage Tea and Sulphur. Whenever her hair took on that dull, faded or streaked appearance, this simple mixture was applied with wonderful effect. By asking at any drug store for "Wyeth's Sage and Sulphur Compound," you will get a large bottle of this old-time recipe, improved by the addition of other ingredients, all ready to use, for about 50 cents. This simple mixture can be depended upon to restore natural color and beauty to the hair.

A well-known downtown druggist says everybody uses Wyeth's Sage and Sulphur Compound now because it darkens so naturally and evenly that nobody can tell it has been applied—it's so easy to use, too. You simply dampen a comb or soft brush and draw it through your hair, taking one strand at a time. By morning the gray hair disappears; after another application or two, it is restored to its natural color and looks glossy, soft and beautiful. This preparation is a delightful toilet requisite. It is not intended for the cure, mitigation or prevention of disease.

The Contrary.
"Many characters are lost in these investigations."
"Oh, no, not lost—they're discovered."—Exchange.

Slacker.
"Did he favor volunteer or compulsory service?"
"Neither. What he wanted was volunteer exemption."—Buffalo Express.

Why He Writes.
"Since he has been at college Harry's letters are all so short."
"So's Harry. That's why he writes 'em."—Baltimore American.

Another Kind.
"The Smiths had a big blow-out the other night."
"Was it their daughter's birthday celebration?"
"No; it was their automobile tires."—Exchange.

What Is Uric Acid? THE CAUSE OF BACKACHE, RHEUMATISM, GRAVEL AND SUDDEN DEATH.

Ever since the discovery of uric acid in the blood by Scheele, in 1775, and the bad effect it had upon the body, scientists and physicians have striven to rid the tissues and the blood of this poison. Because of its overabundance in the system it causes backache, pains here and there, rheumatism, gout, gravel, neuralgia and sciatica. It was Dr. Pierce who discovered a new agent, called "Anuric," which will throw out and completely eradicate this uric acid from the system. "Anuric" has proved to be 37 times more potent than *litane*, and consequently you need no longer fear muscular or articular rheumatism or gout, or many other diseases which are dependent on an accumulation of uric acid within the body. Send to Dr. Pierce, of the Invalids' Hotel and Surgical Institute, Buffalo, N. Y., for a pamphlet on "Anuric," or send 10 cents for a trial package of "Anuric Tablets."
If you feel that tired, worn-out feeling, backache, neuralgia, or if your sleep is disturbed by too frequent urination, go to your best drug store and ask for Dr. Pierce's Anuric Tablets. They are put up in 50-cent packages.
Doctor Pierce's reputation is back of this medicine and you know that his "Golden Medical Discovery" for the blood and his "Favorite Prescription" for the ills of women have had a splendid reputation for the past fifty years.

Doctor Pierce's Pellets are unequalled as a Liver Pill. One tiny Sugar-coated Pellet a Dose. Cure Sick Headache, Bilious Headache, Dizziness, Constipation, Indigestion, Bilious Attacks, and all derangements of the Liver, Stomach and Bowels.
