#### FAKE RELIEF SOLICITORS

This is an era of high prices. Bankers and financiers generally tell us there is plenty of money in circulation now. Naturally in flush times people are inclined to loosen up on the purse strings. This is commendable, especially in view of the many calls that are being made on the generosity of the public.

But if we are not very careful, much of our charity will be misplaced. There are legitimate calls that we must meet, and we can not afford to be humbugged. The government must be financed, the Red Cross and kindred organizations must be supported and it will take every dollar we can rake together to meet these demands.

Aside from these legitimate demands, though, every now and then we are importuned to give to this, that and the other so-called "relief" scheme. People with more "patriotism" than brains conceive that the soldiers are not being cared for, and a "bazaar" is promoted to give the needed relief. The people out of their loyalty and generosity respond liberally, with the result that if the promoters are honest and disinterested, the soldier boys are deluged with a lot of junk for which they have no earthly use. In many cases, however, the promoters are "interested" more in themselves than in the boys, in which case the proceeds are mainly eaten up in the form of salaries and expenses.

The Government has issued instructions for all the auxiliary work it wishes the people at large to assist in carrying on, and it will be well for all to read up on these instructions, that they be not duped. Not every young enthusiast who can scare up a red, white and blue sash and

take a collection for a "cause" is to be encouraged.

There are, as we have said, legitimate channels through which our relief can be bestowed, and we should be very careful to see that it goes through these channels, that it may be sure of reaching the object for which it is given.

There are indications that Mr. Hoover's efforts will eventually bring flour on speaking terms with the people.

The Kaiser is quoted as saying that all he wants is justice, and the Allied world is of one mind in the determination to see that he gets it in full measure. The probabilities are, however, that his kaisership won't recognize the article when he sees it coming.

If an object is needed to show in what light Germany regards neutral nations, and to verify her estimate of a treaty as a "scrap of paper," the fate of Norway is ample for the purpose. That nation, although adhering scrupulously to a policy of neutrality, has lost hundreds of ships by German submarines and mines, and not less than 5,000 lives with them. No one of the allied countries' navies have suffered to the extent that Norwegian shipping has suffered.

The Russian Bolsheviki seem to have been handed a lemon in the German peace proposals. The Kaiser's government modestly demanded control of the Russian wheat market for a period of fifteen years, that she retain all Russian territory now occupied by her troops, and that all German made goods be imported into Russia duty free. Doubtless there were some minor concessions she would have also, but she hoped to have no trouble in securing these when she had her victim securely tied. But even a Bolsheviki has glimmerings of reason and the proposition was not received with enthusiasm.

#### For a Postage Stamp, \$670.

The highest price paid lately for a postage stamp was \$670, a sum given at a New York auction the other day for a five cent Hawaiian missionary stamp of the issue of 1851. When the early missionaries went from New England to Hawaii they looked ahead to many things, but hardly to the sale of their postage stamps at prices higher than their salaries for a year.

#### Testing a Hat.

Put on your hat and all outdoor regalia, says the London Chronicle, and then go where you can stand between a strong light and a bare wall. Notice your silhouette and note the proportions and symmetry. If these are not artistic or satisfactory throw away the hat and buy another.

#### Well Worn Question.

If a mother were to paint a green ring around her nose and dye her hair blue the first words of the husband and children on coming home would still be, "Is dinner ready?"—New York Sun.

#### New Idea in Battleships.

A captain in the United States navy has made a proposal for the building of a 600 foot battleship which would be semi-submersible.

#### FOR WOMEN MOTORISTS.

Some Things a Good Driver Should and Should Not Do.

The good driver of a motorcar never applies brakes swiftly except in an emergency. When drawing up at a street side she cuts off ignition early and allows momentum to carry the car to the stopping place, using the service brake gradually. The good driver thus saves gasoline and wear upon brakes, coasting to a stop with the smoothness of operation of an easy start.  
A good driver never uses the emergency brake, because she never has emergencies. She sees and avoids the emergency before it arrives. The poor driver rushes into trouble and depends upon quickness in grabbing the emergency lever to save life. More than one accident has followed a futile attempt to find the seldom used emergency lever in a hurry.

The good driver rounds sharp corners to the right and goes over extremely rough stretches of road or hits unexpected "thank you ma'ams" with clutch disengaged, to save the rear axle mechanism.  
The good driver uses the wheel with the least possible motion. She does not drag it suddenly from side to side, but turns it so gradually that passengers are unconscious of the fact. In rounding a corner she commences to straighten the car up before it is half-way around.—Woman's Home Companion.

#### RECORD COAL LOADING.

Uncle Sam's Plant at Cristobal is the Fastest in the World.

The good work of the Cristobal coal loading plant at the isthmus of Panama is the subject of a report received at the war department from one of its boards, whose conclusions are that the plant fully meets the plans of the engineers and is probably the most efficient loading plant in the world. It was found that the minimum performance during the test was 1,950 tons an hour and the maximum 2,486 tons. The minimum occurred when one of the four diggers was temporarily out of commission, due to a defective bucket. At 2,400 tons an hour the plant far exceeds the work of any other known plant for loading steamships or even of railroad loading plants. The canal collier Ulysses was loaded at the rate of 1,550 tons an hour, and 12,000 tons were put on her in eight hours. Merchant ships cannot be loaded at this rapid rate, as their hatches are too small and their bunkers are not arranged to admit of such work. This is a feature in shipbuilding that is being carefully taken care of nowadays in constructing ships that are to pass through the canal. All new United States naval colliers are so built that they can be loaded at high speed.

#### Garment Making in New York.

The garment making industry in New York, much before the public nowadays by reason of the efforts of the save New York committee to move its base from the retail shopping district in the Fifth avenue section, is really one of the biggest assets the city has. Some 16,000 factories are operated for tailoring, millinery, laundering and other branches of work upon garments, employing more than 300,000 persons. Their output exceeds goods valued at \$500,000,000 annually, aiding materially in making New York the leading manufacturing center of this country, Chicago, Philadelphia, St. Louis, Boston and Cleveland following in the order named.

#### Join the Pay Up Crowd.

John D. Rockefeller often referred proudly to the fact that when he was making \$25 a month he made it a point to pay all his bills promptly. He also managed to save a little money that later became the foundation of his great fortune. When you pay your bills promptly you know just where you are at. Pay up is becoming a national slogan. Cities and states have inaugurated pay up days and pay up weeks. The man who pays his bills when they are due feels better for it. There is no doubt that it makes the man he owes feel better. Do your part in the pay up campaign. Pay now.

#### Pays His Men Each Day.

Contractors in central Pennsylvania have solved the problem of keeping labor on the job. The force of one contractor who began paying his men off every day instead of at the end of the week was so pleased with the arrangement that it stuck by him, and other contractors have adopted the same plan. According to reports, the plan has met with success wherever tried.—Engineering Record.

"Burglars broke into Brown's house the other night."  
"Did they get anything?"  
"Nothing but some jewelry. They overlooked a steak and a dozen fresh eggs that were in the icebox."—Detroit Free Press.

#### Coney Island.

Coney Island was called Coney or Rabbit Island by the Dutch as early as 1608. Henry Hudson landed on Coney Island on the voyage in which he discovered the Hudson river, on Sept. 2 or 3, 1609.

#### Why Shouldn't He?

"He says he loves his wife better every year."  
"And I believe him. That woman has received three inheritances since he married her."—Exchange.

No man is such a conqueror as the man who has conquered himself.—Beecher.
