THE BLOOD CALL

There is no finer sight in this old world than perfect blood loyalty—families bound by the ties of blood, cemented into one compact band to promote and defend the interests of the whole.

The hour has struck when this call is ringing clear and loud above all others in the ears of the American people. Every city, every town, every hamlet and every community in the land has given of its best beloved blood to swell the expeditionary forces on the battle fields of France. These men have gone to fight our battles. They have offered their all in our service. The blood tie holds them firmly to the task which they are dedicated to. We have the word of the commanders—that the blood loyalty is perfect.

But is theirs to be the only demonstration of the power of blood loyalty? What man worthy the name, if he has a friend fighting his battles, will not back him up and support him to the limit of his power? Is the sacrifice to be out of all proportion to the gratitude of the beneficiary?

These thousands, these hundreds of thousands, who have gone, are going, and who are yet to go—flesh of our flesh and blood of our blood—are appealing to us through every affection of the human heart for support, for sustenance, for co-operation, for power. These we must furnish or their sacrifice will have been in vain.

But we Americans need to be told that the very essence of blood loyalty is Sacrifice. Not only a professed willingness to sacrifice if necessary, but real sacrifice—the total subordinating of our interests to theirs.

Mothers, fathers, sisters, brothers, friends of our soldier boys, are we heeding the blood call? Or are we by our lethargy and indifference manufacturing German bullets for their breasts—for that is the inevitable result if we fail in our response to the call.

PROJECT DEMONSTRATION WORK

A change in management of the experiment station at Hermiston has been made to fill the vacancy in the office of Project Agricultural Demonstrator caused by the resignation of Paul S. Jones. Demonstration work on the project has been conducted for three years with special emphasis on the preparation of land for irrigation and crops. In this work the results of determinations made at the experiment station were taken direct to those who were reclaiming the land.

The demonstration work has for a time been partially taken care of by R. W. Allen, superintendent of the experiment station. During this time a change has been worked out which releases Mr. Allen from the experiment station and places him in charge of the demonstration work, and puts H. K. Dean in charge.

This transfer will enable the demonstration work to be decidedly broadened. The most important phases of agriculture on the project will now be given attention, as well as the work of laying out ditches, etc., being continued. Requests for assistance on agricultural topics generally should be directed to R. W. Allen, who has an office in the reclamation building.

All of the work of the experiment station will be continued.

Many of the experiments demonstrate practices which can be adapted to good advantage on numerous farms on the project. Everyone who is desirous of learning more about the business of farming, and those who wish to see the progress and results of the work should go to the experiment station and look the numerous experiments over.

It is thought that these changes will greatly favor the agricultural development on the Umatilla project since men having a thorough knowledge of the experiment station and demonstration work are now in charge.

For Sale—Roselawn Farm, one and one-quarter miles southwest of Hermiston. One of the finest orchard-alfalfa tracts on the project. Mrs. Geo. Davis. 13cfc.

MANY GOOD POSITIONS

Can be had by any ambitious young man or woman in the field of railway or commercial telegraphy. We want a number of young men and women to prepare for the telegraph service to fill vacancies caused by unusual drafting of young men for signal corps. Prepare to help your country. Write today for full particulars. The Railway Telegraph Institute, Portland, Oregon. -adv21-28

We have just received a new supply of "Rite Grade Shingles." The right grade label on a bundle of shingles means full value in that bundle. It means that the association has inspected and o. k'd them for no sap, for selection, for thickness, for size, for grain; in fact it means a perfect shingle, true to specifications.

One of our local contractors who has been here ten years said that they were the best shingles he has ever seen in Hermiston.

Be sure and ask for
Rite-Grade Shingles
