"A man suffered for years from acute rheumatism. He went from one doctor to another without relief. Finally he went to his dentist one day to have his teeth fixed. A blind abscess was found which was opened and cured. Immediately his rheumatism disappeared.

"Another had a supposed case of spinal trouble. No doctor gave him relief until, finally, one suggested that he have his teeth examined. Pyorrhea was discovered, cured and spinal trouble left him." —(Clipping from Ladies' Home Journal February, 1917.)
