It Is Practical
Economy To Paint
Your Buildings
Now and Protect
Your Property
From Decay
and Ruin

Allowing your buildings to go unpainted in order to save paint money is like allowing your insurance policy to lapse because you want to save the premium. Either is poor economy.

Millions of dollars are lost annually because property is not protected against weather, for unpainted buildings offer no resistance to the destructive elements.

Property insurance requires paints and finishes of the finest quality. Wind, rain, sunshine, snow—each acts differently upon a painted surface. It is necessary therefore to use great care in the selection of paints and varnishes for this important task of protection.

For fifty years and more Sherwin-Williams products have been accepted and used as standard high quality finishes. They will successfully protect and increase the value of your property.

A full line of Sherwin-Williams finishes at our store. May we not talk over painting plans with you?
