"Rechickening" France
A movement has been started to "rechicken" France. When Germany invaded northern France in 1914, she destroyed all the things that the poor people left behind them when they had to leave. The chickens could not be taken with them so they were destroyed, too.

When the people returned, their chickens and other animals were gone, they would have starved if some kind American ladies had not organized a movement to "rechicken" France. The McCall's magazine has charge of this movement and wants you to help.

Mrs. Voelker started the movement in Hermiston by sending for some badges. She gave three of them to the members of the Junior Red Cross for the best hemming of handkerchiefs. The winners were Marion Stevens, Effie Goodwin, and Fern Wilson. The rest were sold to the other pupils.

All you need to buy one is a dime. Send it to Miss Merle Hall, teacher of the sixth and seventh grade. She will send the dimes to "The McCall's Magazine and give you your badge when it comes. The badge says, "I have a chicken in France."

The egg that is bought with your dime is hatched on board the ship going over to France. The baby chick is taken and given to some poor French family.

Please send some chickens to France instead of getting Easter eggs.

Will you help?

Pointers For Autoists
A resourceful motorist whose car has been stuck in the mud does not always have to fall back on a pair of mules to get free. For such an emergency the United States Tire Company offers some suggestions that have proved valuable.

The first calls for having stored away somewhere in the car a stack of old newspapers. When the car gets stuck and the wheels refuse to take hold, feed in some of the old papers between the tires and the mud. Usually only a few will have to be worked in before the wheels will begin to grip and the car started forward. This method of handling a difficult situation is so simple and so uniformly successful, that every motorist should know of it and carry a pile of old newspapers, unless he is equipped with some other apparatus for such a contingency.

Here is the other method suggested by the United States Tire Company: Put the car in low, and if you cannot feed the gas with your foot evenly, so that the wheels will revolve slowly, put your emergency brake on. Do not put it on so that the wheels will not revolve at all, but tightly enough to keep them from revolving rapidly. With the wheels turning slowly, the maximum pull is delivered to them by having the car in low gear, and so long as they turn slowly they can get the benefit of the tremendous power.

It is not always wise to fill the hole with stones or bricks, for their rough edges are hard on tires. Small branches of trees are better, as they offer much better tractive space. Should this method fail, quite often a slight push that would not much more than move a baby buggy will furnish just the added amount of power necessary to get the car going.

NORTH RIDGE NEWS

SPECIAL CORRESPONDENCE

Last Saturday evening a neighborhood party was given at the home of Mr. and Mrs. A. N. Kerns, who live three miles northeast of town. The weather was rainy, but it didn't dampen the spirits of the North Ridge folks who gathered to have a good time. The evening was spent with music and dancing and a social good time resulted. At the hour of midnight a delicious lunch was served, and at 1 o'clock the 30 guests departed with the memory of a pleasant time and with the anticipation of more to come.

The Tum-a-Lum has a car of Utah Egg Coal on the track today and Monday. \$10 from the car. Leave orders or phone 111.
