HIGH SCHOOL NOTES

Today, April 19, the annual Track Meet and Declaratory contest is being held in Stanfield. The participants in this contest were chosen through try-outs in the local schools. The winners in this district meet are sent to meet in a final County contest held in Pendleton two weeks hence. The names of the representatives from the Hermiston school will be published next week.

Big Sale Continues

The big stock reducing sale being carried on by that well known and popular expert salesman, G. W. Kelly of Seattle, for Gibbons & Cramer at Boardman still continues to draw attention. Mr. Cramer, part owner and manager of the store has had the sale instituted at this time in order to make room for a choice stock of dry goods and merchandise he has recently ordered. He is thoroughly satisfied with the way the old stock is being bought up by patrons, and when the new goods arrive and are placed on the shelves the store will be replete with merchandise that is new, fresh and dependable.

Costly Fire

Fire which originated in a smoke house on the Charles Baker ranch just east of the city Monday during curing operations of a large number of choice hams took many people from here on a hurry up call. Being outside the fire limits a bucket brigade was used instead, but this made little headway, as the flames had gained such a long lead as to completely destroy the smoke house and between \$150 and \$200 worth of pork that was owned and being cured jointly by Mr. Baker, E. P. Dodd and Walter Rees.

Road Work Begins

The Newport Construction Co. and the contracting firm of Shotwell & Co. have secured the contract to grade the 20 miles of the state highway from the Morrow county line to Echo. These firms have already begun operations with a force of men and teams. Shotwell & Co. will grade the stretch from the railroad crossing in Hermiston to Echo and the Newport Construction Co. will grade that portion extending from the crossing to the Morrow county line.

LESSON NO. 5. JOHNSTON ALFALFA MOWERS

Supplementing our last four advertisements, we desire to add Johnston facts as follows: All parts where breakage is liable to occur are made from either malleable iron or steel. Every machine is thoroughly tested before leaving the factory. The cutter bar and knife are attached and the machine run at a much higher rate of speed than when in use. By this means the correct meshing of all gears is ascertained and corrected. Every effort is made to produce a substantial and durable mower and our customers may feel assured that in purchasing a Johnston they are buying a machine that has more good, honest qualities than any other make. The closing lesson on why to own a Johnstone Alfalfa Mower will appear in the next issue of this paper and the week following a factory man will be in Hermiston to prove why the Johnston is best. We want all ranchers to meet this ALFALFA MOWER SPECIALIST, who has made this ONE THING ALONE his business for many years and WHO KNOWS.

"Certainly! Buy a Johnston."
