Books and Apples.

A young lady in a library got tired of fussing round in stuffy alcoves. So she chucked it all and went to raising apples. She never made money hand over fist, as she expected, but she always declared she had won out on the exchange. "I used to like an occasional apple with my books," she declared, "but the present plan of having a book now and then with my apples is a heap better."—Collier's Weekly.

KAHN POINTS WAY TO ESCAPE HEAVY TAXES

California Congressman Says People Must Cooperate With Government

Congressman Julius Kahn of California, senior member of the Military Affairs Committee of the House, in a signed statement given out at Washington, reviews briefly some of the problems confronting the government in post-war finance and urges the country to help congress hold down taxes. He said:

"How is the United States going to pay her war debts which are now beginning to flood the nation's treasury? The outflow of public funds today is almost on a par with the expenditures made while the war was raging. Although there are no more munitions or implements of war to be purchased, the engines of destruction which American factories created to bring about the downfall of the imperial government of Germany have not all been paid for. Then there are the heavy expenditures incident to readjusting the world from a war to a peace basis. Reconstruction Cost Heavy.

"It is no news to students of history to be told that the expenses of post-war reconstruction have always been as great and many times greater than the actual war outlay. Food must be shipped to our boys who are still on foreign soil. Money must be raised to further projects having to do with fitting these noble heroes of ours with suitable occupations. Those who have been maimed must not be made to come into competition with the sound.

"Where is the money to come from? The people themselves, although they lent patriotic and wholehearted support to the government's war program and made unprecedented sacrifices, keenly felt the effect of the taxes imposed in the revenue bill such as they had never faced before and would have not submitted to except in view of extraordinary circumstances. Now that the war is over we must find some way of raising money to finance the various necessary projects confronting the nation.

People Must Cooperate.
The people must cooperate, and they can cooperate without paying heavy taxes. They can continue to invest in War Savings Stamps, Liberty Bonds and other government securities, and help the government by helping themselves.

"The government offers its citizens a two-fold proposition, mutually helpful. Funds can be raised to help the government meet its obligations, by the patriotic cooperation of the people, who are at the same time making as safe an investment as can be made in securities, backed by the most stable business on earth, that of Uncle Sam."

POOR FINANCE TO LET BANKS TAKE V. LOAN

By M. S. Wildman, Head of the Department of Economics and Political Science at Stanford University, California.

Just about two years ago we began to make war and stopped making a lot of other things or made these other things only in limited supply. Railway construction came to a dead stop. Equipment was worn out faster than it was replaced. All over the country building operations were suspended. In the North Atlantic states, alone the deficiency in building is estimated by the Department of Labor to exceed \$500,000,000. If the situation all over the country is comparable to this, the accumulated need for construction now exceeds two billion dollars. Through a wide range of manufactures from automobiles to chewing gum curtailment was the order of the day until now we face a deficiency in numberless commodities of customary use.

The emergency which led to curtailment is happily past. The interest of all classes of people requires the quickest possible resumption of normal activity. Consumers want the goods, returning soldiers need the employment. The heavy war taxes call for correspondingly large production while European reconstruction will open the way for exports.

This resumption of enterprise, if we embark upon it as we should, will require bank loans on a tremendous scale. The high wages and high cost of materials will necessitate advances proportionately greater than in the past. To be available for this purpose, the funds of the banks must not be absorbed by government requirements. The necessity for a wide public participation in the Victory Liberty loan is even greater than it was in the case of earlier loans when curtailment of industry diminished the needs of private business.

If the banks are compelled to carry the government, they cannot at the same time carry their customers. For every billion dollars worth of bonds left on the hands of the banks there will be just a billion less for the revival of industry and the employment of labor.

It is to the personal interest of every man and woman in America to subscribe to the Victory Liberty loan out of his or her savings.

"The woman who can save money wins masculine respect and feminine envy."—Mrs. Carey.
