

A GOOD BARN A PATRIOTIC DUTY

Feed is expensive nowadays. Every possible ounce of it must be converted into beef or milk or working energy for the teams.

Stock lacking the protection of a good barn consumes most of their feed in fighting the cold—or lacking the cool refuge of a properly insulated barn during the heat of summer, becomes indisposed and loses weight.

Feed converted into animal heat doesn't make beef or milk or money.

The essentials of a good barn are good materials, proper ventilation, sanitation and insulation.

Let us figure with you. It's our business. We know how. There is no obligation to buy.

We have a number of different designs to choose from and will consider it a favor in being able to quote you prices.
