**ROCK ISLAND PLOWS**

These plows are made of soft center steel, permitting the outer surface to be highly tempered without sacrificing strength. The center layer is very tough and ductile, making a combination steel that is adapted for the hardest kind of work. The shin of the moldboard always receives the most wear, and for this reason Rock Island soft center steel plows have a reinforcing patch at this point. The real appreciation of these features is best realized after giving a Rock Island plow a few years use. We sell them—terms or cash.
