ADDITIONAL LOCAL

Lays' Garage is now a sub station for the Willard Battery service.

Attorney J. T. Hinkle, who had been in Salem the past month on legal business connected with the Teel project, arrived home Thursday.

At the sale of lots sold for delinquent assessments Tuesday the city of Hermiston, bid in a majority of them.

Thursday of this week W. A. Leathers disposed of his feed line located on the West Side to the Kingsley Mercantile Co. However, we are not going to lose "Billy," as he will continue in the wholesale and retail hay buying and selling business as formerly.

Many improvements are being made in the local Catholic church, Albert Smith having the contract for the building of a new choir loft, which will be completed the latter part of this week. Before Easter Father Butler will have a new main altar and two new statues in the church, which will add very much to its appearance.

Going to Put One Over

Industrial Club members in the Umatilla school are going to put one over their clubs in the county if H. C. Seymour, state club leader, who recently visited that school, is a fair judge of the work being accomplished along this line. The Sewing Club, having a membership of 14 girls, is doing good work under the excellent leadership of Mrs. W. T. Lambert. In order to facilitate the work of the sewing class the school recently purchased an electric sewing machine. The organization holds a meeting every week and the work being accomplished is inspected and given close supervision.

UMATILLA ITEMS

The week of March 8, 9 10 there will be a sewing expert from the O. A. C. in Umatilla under the auspices of the Home Bureau. Three different lines of dressmaking will be taken up, one each day. Mrs. McKenzie has very graciously given her house for the classes, which will be started at 9 a. m. and end at 5 p. m. each day. Any Hermiston lady who is interested is invited to be a guest of the Home Bureau.

Monday, March 8, and ending Saturday, March 13, will be clean-up week in Umatilla. An able committee has been appointed to handle the work, and with the assistance of each resident and all the school children, Umatilla promises to be a very clean city. On Saturday, the last day of the clean-up week, there will be a celebration, with a picnic lunch and jubilee in which all will participate.

March 17 is state wide tree planting day, and Umatilla intends to fittingly celebrate by planting trees on the highway and new park site.

The Ladies Home Bureau of Umatilla gave a card party and supper on Saturday night, February 28th, which was largely attended. Thirteen tables of progressive whist were in operation. Two first and two booby prizes were awarded. Mrs. Conlin and Mr. Harvey capturing high honors. Financially it netted a neat little sum for the hot lunch treasury.

Friday night a committee from the Ladies Home Bureau met with the Umatilla Commercial association to take up several projects in which they are interested, and to seek the cooperation of the men members of the Commercial body. Principally the ladies are boosting better streets, market roads, more trees for the streets, a park that will encourage tourist travel to stop and rest in Umatilla, drinking fountains, teachers' cottages and many other things. The men seemed to appreciate the "pep" displayed by the ladies to such an extent that D. R. Brownell voted to extend honorary membership to all the members of the Home Bureau, with full privileges and no dues. The honor was greatly appreciated by the ladies.

Mrs. W. R. Nugent and daughter Gladys spent Wednesday and Thursday in Portland visiting friends.

Mrs. E. G. Dykstra and two children left for Tillamook last week, to be gone several weeks visiting her parents, who have a large dairy ranch at that place.

Mrs. J. G. Camp and little daughter Carol have almost fully recovered from a severe attack of flu.

The Catholic Women of Umatilla have organized an altar society, which hopes to do a great deal toward repairing their church and grounds and many other necessary things.

P. F. Fallon, agent at Umatilla, spent several days last week in Portland, Tacoma and Seattle.

ROCK ISLAND PLOWS

These plows are made of soft center steel, permitting the outer surface to be highly tempered without sacrificing strength. The center layer is very soft and ductile, making a combination steel that is adapted for the hardest kind of work. The shin of the moldboard always receives the most wear, and for this reason Rock Island soft center steel plows have a reinforcing patch at this point. The real appreciation of these features is best realized after giving a Rock Island plow a few years of use.
