**A FEW POINTERS**

It takes a woman to conceal what she does not know.

Necessity is the mother of a good many alleged poems.

Even a plate of hash looks good when you are hungry.

That we have a right to say what we think only when we are thinking that which it is right to say. Many thoughts are too warped by selfishness and unkindness to stand that test.

That one point of weakness in much of our revolving is that we try to grasp too much of life at one time. We think of it as a whole instead of taking the days one by one. Life is a mosaic, and each tiny piece must be cut and set with skill.

How many repentant sinners would there be if no wrongdoers were ever found out!

**ADDITIONAL LOCAL**

The demure lass used to walk away with the bacon, but the one who brings home the husband these days is the one who jumps at him and bites her initials in his cheek.—Chicago American.

**LITCHFIELD SPREADERS**

There is no manure spreader equal to the Litchfield and there is no manure spreader sold on such liberal terms without interest as the Litchfield. The reason is, the makers are not afraid to have the machine out and paid for, as they know it will make good and earn its own cost in the time allowed for payment without interest.

**"Blowouts" A new Rubber compound that resists them**

TWO years of road tests have demonstrated the Thermoid Crolide Compound Tire to be remarkably resistant to blowouts.

This result is not accidental. It is the Thermoid Chemists' answer to this most common of all tire weaknesses.

A new rubber compound

Crolide, the new substance developed in the Thermoid Laboratories is com-

pounded with Up River Fine Para. It is blended not only with the rubber that goes into the tread, but with each layer of the rubber treated fabric.

One Thermoid Crolide Compound Tire will prove to you its resistance to the attacks of oil, water, heat and similar agencies which weaken tires and lead to blowouts.

Guaranteed 6000 miles (Ford sizes 7500).

You can't pull the tread off a Thermoid Tire
