Drops Every Seed at the Bottom of the Furrow
Here is the profit maker for the farmer who grows grain of any kind. Famous Peoria Single Disc Furrow Opener insures even depth planting, uniform yields. Shoe works independently of the disc, on a pivot, allowing it to follow disc at all times. No matter what depth the disc cuts, the seed is always drilled at the very bottom of the furrow. This means all your grain grows and ripens evenly.
Peoria Disc Shoe cuts any trash and hardest ground; double run force feed; sows all kinds of grain, flax, peas, beans or corn. No seed wasted—none lost to the birds or wind—it is all covered on the bottom of a packed seed bed.

DONT PUT IT OFF—INVESTIGATE NOW!

Wood Break Pin
(an exclusive PEORIA feature)
For Feed Regulator

When foreign matter (nuts, bolts, stones or screws), often found in seed, get into ordinary grain drill feeds, gears are broken, feed shafts twisted, causing expense and loss of time. On Peoria Drills it simply shears a wood pin that can be quickly replaced without expense. An exclusive feature which makes Peoria Drills worth five to ten dollars more to the farmer.
