## SPRAY NOW

The famous Bean Sprayer, known from coast to coast as the only sprayer that has the full pressure at the nozzle not alone at the gauge. We mean by this that other makes of sprayers, while the gauge may show 200 to 250 pounds the real spraying pressure at the nozzle is usually over 50 pounds less. This is not so with a Bean. Let us tell you why.

# McCormick International Deering

YOU know these trade names. Your father and grandfather knew most of them. They knew in their time and you know today, through long usage and satisfactory service, that there are no better farm machines and implements made than those bearing the above trade names, which are guarantees of high quality.

And now these time-honored, service-renowned lines have been merged into one—the International Harvester—representing the cream of the farm machine world. And—

## We Sell the International Line

which includes:

Harvesting Machines  
Tillage Implements  
Kerosene Tractors  
Kerosene Engines  
Farm Wagons

Plows  
Seeders  
Threshers  
Cream Separators  
Feed Grinders

Hay and Corn Machines  
Seeding Machines  
Motor Trucks  
Manure Spreaders  
Binder Twine

## What does this mean to you as a Farmer?

IT MEANS, first of all, that you buy any machine or implement you may need from one concern—us—without taking chances on experiments or implements that might be orphaned one or two years after you buy them because of the manufacturer going out of business. You can always get repairs for any machine or implement in the International line, because the Harvester Company will never go out of business.

AND you don't have to go to the bother and expense of trying to get repairs and repair service from half a dozen or more different companies. You won't be taking chances on expensive delays waiting for repairs during the busy season, because we are going to carry a big stock of repairs on hand, and any extras that we might not have on hand at any time can be secured in a hurry by a 'phone call to the International Harvester branch house.

Tack this advertisement up in your machine shed, so that whenever you need repairs for any of your international machines you will know, without wasting time, where to go for GENUINE INTERNATIONAL REPAIRS. We handle repairs for the complete International line. Also, you will know where to go when you are in the market for new machines and implements of real quality.
