

FARM POULTRY

WINTER GREENS FOR FOWLS
Cabbages, Turnips, Beets, Potatoes, Etc., Are Suitable Feeds for Cold Weather.

(Prepared by the United States Department of Agriculture.)

If the best results are to be obtained with poultry they must be furnished with a plentiful supply of green feed. Where fowls have unlimited range on a farm they will secure green feed during the spring, but during the winter it must be supplied for them. The question of how to supply the best feed at the least cost is one that each poultry keeper must decide largely for himself. It will probably make but little difference what kind of green feed is supplied, provided it is relished by the fowls. Cabbages, turnips, beets, potatoes, etc., are suitable for this purpose. The larger roots and the cabbages may be suspended by means of a wire or string, or they may be placed on the floor, in which case it would be well to split the turnips or beets lengthwise with a large knife. Potatoes and turnips should be fed cooked. The mangel is an excellent root for feeding raw. Cut clover soaked in boiling water fed alone or with the mash is good. Clover meal and ground alfalfa make very good feeds for this purpose. Where the fowls are yarded and not enough green feed is furnished by the yard a small patch of clover, alfalfa or rape may be sown. Any one of these, if frequently mowed, will furnish a great quantity of green feed in a form which is relished by the fowls. Canada field peas may also be sown for this purpose, and when fed in a ten-

Provide Plenty of Winter Succulence for the Flock.

der, crisp condition are eaten readily. Rye is a good crop for late fall and early spring, for it will germinate and grow in very cold weather and will live through the winter. As a general thing fowls should have once a day about all the green feed they will eat.

MILK AIDS EGG PRODUCTION

Value as Part of Poultry Ration Strikingly Demonstrated at Purdue University.

That milk has a value as a part of the poultry ration was strikingly demonstrated by the results obtained on one of the poultry demonstration farms which are established and conducted by Purdue university.

One farmer who had been feeding milk to his flock discontinued doing so with the arrival of the summer months thinking that the fowls would pick up enough insects to make up for the food value that was furnished by the milk. Almost immediately, however, his daily egg production began falling off until, in one month, it had dropped off to one-half what it had been for the month previous. When milk was again made a part of the ration, the daily egg production gradually increased. As a result of the milk fed, the production the following month was as good as in the spring months and the extra profit made more than paid for the milk fed.

MUCH DIFFERENCE IN CAPONS

Certain Standard Requirements Which Fowls Must Meet to Bring Highest Prices.

There is just as much difference in the quality of capons as of other meats. There are certain standard requirements which the birds must meet to bring the highest prices. Quality counts, but size as well as quality is required in capons.

POWDER IS ALWAYS IN ORDER

Dust Bath is Essential in Ridding Fowls of Vermin—Whitewashing is Effective.

The free use of an effective lice powder is always in order. A dust bath is very essential in ridding the fowls of lice. Whitewashing is effective against vermin. Use kerosene on the roosts and in the cracks to exterminate mites.

What's become of the prejudice against automobiles because they frightened the horses

NOW cars are everywhere. The horses have gotten used to them—and so has everybody else. Think of it! This year the American people will spend nearly a billion dollars on tires alone.

Tires are one of the *biggest items* on the car owner's bills.

Hardly a Saturday, when you motorists drop in to "tune up" for a Sunday trip, that one or more of you doesn't tell us something of value to our business. Sooner or later it comes back to you in *Service*.

Service is what the car owners of this community are looking for nowadays.

And especially the *small car owners*, who put service

first in figuring their motor-ing expenditures.

Just because a man has a moderate-price car is no reason why he should get any *less service* out of his tires.

We believe that the man with the small car is entitled to *just as good* tire service as the man with the big car—and both are entitled to the *best tire service* they can get.

That's why we represent U. S. Tires in this community.

And why more car owners—*large and small*—are coming to us every day for U. S. Tires.

Come in and talk to us about tires. We're here to help you get the kind of tires you want.

MARNE MEMORIAL POSTER

JUST as the school children of France gave for their country's gift to the United States—the Statue of Liberty—so will American school children contribute "one cent and upward" for "America's Gift to France," a monumental statue by Frederick MacMonnies, the noted American sculptor. Mr. MacMonnies is contributing his services toward the monument which is estimated, will cost \$250,000. The poster shown herewith, is by Albert Sterner, noted American portrait painter. It typifies the tribute which his country will pay to the French through the Marne monument. The poster will be displayed in cities, towns, and villages, and will designate many of the places where contributions may be made during the week of March 22—a free-will offering, in which numbers of contributors, rather than size of contributions, will be sought from school children and others. Contributions are now being received at National Headquarters, 150 Nassau street, New York, by Charles H. Sabin, president of one of New York's largest trust companies, who is treasurer of the fund. The memorial will be erected at Meaux, on the Marne, and will rival in size and grandeur of design the Statue of Liberty.

**Department of the Interior
United States Reclamation Service**
Hermiston, Oregon, May 5, 1920.

Pursuant to Act of Congress approved February 2, 1911, (36 Stat., 895), the United States will offer for sale at Public Auction to the highest bidder, at 2 p. m., June 10, 1920, at Foster Flat Headquarters, near Stanfield, Umatilla County, Oregon, the following described real property in Umatilla County, Oregon, described as follows:

Beginning at a point on the Western boundary line of Section Thirty-three (33), Township Four (4) North, Range Twenty-nine (29) East of the Willamette Meridian, distance Four Hundred Forty-two and Eight-tenths (442.8) feet southerly from the Northwest (NW) corner of said Section Thirty-three (33); and running thence Southerly along the said Western boundary line of said Section Thirty-three (33) One Hundred Fifty (150) feet; thence North 74 degrees 53 minutes East One Hundred Eighty-nine (189) feet; thence North 15 degrees 08 minutes West One Hundred Four and Three-tenths (104.3) feet; thence West One Hundred Fifty-five (155) feet to the place of beginning, containing approximately Forty-nine hundredths (.49) acres and all situate in the Northwest quarter of the Northwest quarter (NW 1/4 NW 1/4) of Section Thirty-three (33) aforesaid; containing .49 of an acre, more or less; together with buildings thereon, consisting of one four-room house 14x20 feet and one barn 24x34 feet. The sale will be made on the following terms:

All cash at time of sale or one-half at time of sale and the other half within one year from date of sale. Deferred payments will draw interest at the rate of six per cent. (6 per cent.) per annum. No bids will be accepted for less than the appraised value, and the right is reserved to reject any or all bids.

For detail description of the property and other information address the United States Reclamation Service, Hermiston, Oregon.
