PREPARATIONS PROSPECTIVE TOURIST SHOULD MAKE TO INSURE SAFE VOYAGE

Interior of Main Body of Car Arranged for Sleeping Compartment.

Under the title "High, Low and the Game," Edwin L. Sabin, in MoToR, the national magazine of motoring, writes most entertainingly and helpfully of transcontinental motoring and what preparations the prospective tourist should make to insure a safe and pleasant voyage.

"Tires?" questions the author, and answers: "Any driver who starts out equipped with less than a complete outfit of the best new casings that his money will buy gives a hostage to fortune. This may sound a bit extravagant, but I'll leave the decision to the army sky-pilot whom we passed stranded with two bare rims and a family upon the desert 100 miles from any supply station, or to the supposedly experienced traveling man who had been working for 12 hours at a dobe shack trying to adjust a bor-

rowed 33 straight side casing on a 34 clincher wheel, while awaiting succor from a 50-miles-distant garage."

Spade is Handy Tool.

Gently insinuating that the transcontinental motorist may possibly have to remove a bit of soil on occasion, our author continues: "Spade: Man, man! Don't forget your wife, but for the love of Mike, don't forget a short-handled spade and a couple of boards, likewise a slab or two upon which to base the jack. Where there are miles and miles of sand and shifty gravel, and six inches of either applied just right will stall a car till the grass grows in waste places. It appears idiotic to advise overlancers to pack a spade and adjuncts. Nevertheless a man there was—from Wyoming, too, of all ranges, who seized upon that spade as a great invention."

POULTRY FACTS

TWO BREEDS IN SAME FLOCK

Crossing is Prevented by Keeping Male of One Breed One Year and Another the Next.

(Prepared by the United States Department of Agriculture.)

While keeping two distinct breeds of poultry in one yard without mixing the breeds seems difficult, it can be accomplished easily and with satisfactory results, as shown by the account of an experience just received from a New England poultry raiser. One of the kinds kept is a so-called egg breed, the other being a general-purpose variety of poultry. The method of preventing crossing is as follows:

One year, roosters of the egg-laying breed are retained and used for breeding, no other males being kept. The

First Prize White Rock Cockerel.

Following year roosters of only the general-purpose stock are kept. The difference in the color of eggs of the two breeds selected is so great that hatching eggs have always been selected with a certainty as to the breed laying them. The plan necessitates introducing new males, but the advantages of keeping the blood lines of two breeds separate outweigh the slight cost of purchasing the males. The department of agriculture points out that when this method is followed on two neighboring farms an exchange of roosters might readily be arranged.

The "ladies' baseball team" is another of the misnomers.

The average man isn't looking for justice. What he wants is sympathy.

Next to the perfumed man, the half-burned dead cigar probably is the most offensive odor.

In the case of the cabaret performer the extenuating circumstance is that he makes a living at it.

AVTOMOBILE PAINTS

One of the best rules for keeping a car out of the repair shop is the proper use of lubricants.

It is claimed for the new multiblade fans that they double the volume of air passing through the radiator, keeping the engine cooler in summer.

What, asks Motor Age, has become of the old fashioned motorist who wiped his feet before getting into his car?

American motor cars sell in Venezuela at prices ranging from 50 to 100 per cent more than the prices asked in the United States.

It is advisable to clean and readjust the spark plug occasionally. The points wear away gradually and if not readjusted, cause irregular firing.

PROMINENT WRITER AND POET AT CHAUTAUQUA

Marshall Louis Mertins Comes on Last Afternoon.

Author, lecturer, humorist and staff poet of the Kansas City Star, Marshall Louis Mertins, who comes to Chautauqua on the last afternoon, has made a decided impression in the lecture and literary fields of today. He discusses his subjects with the eager-

ness and optimism of youth, yet he is a deep student and a consistent thinker, and his addresses bear the stamp of the man who has mastered his subject.

Into his lecture, "Rich Man, Poor Man, Beggar Man, Thief," he weaves a world of humor and brightens his splendid inspirational subject with poems from his latest book, "The Sumac Trail."

Stanfield, July 5, 6, 7, 8.

The Problems of Today

Dr. Thomas A. Boyer Presents Them in Stirring Lecture at Chautauqua

"What Time Is It and Where Are We" is the subject of Dr. Thomas A. Boyer's splendid lecture which will be given before Chautauqua audiences on the third night. He discusses ably the vital problems of today and tomorrow and offers sane, sensible solutions to many of the harassing questions of the day.

Dr. Boyer is credited with being one of the greatest lecturers of the West. He is truly a remarkable platform orator and humorist. The Syracuse (N. Y.) Standard calls him "the prince of eloquent speakers." He brings to Chautauqua one of the cardinal features of the four days and every person in the community should hear him.

Fun-Maker at Chautauqua

Watch for S. Platt Jones, the man that's going to "start something" on the second night of the Chautauqua. Jones is that indescribable sort that a Chautauqua's most jovial prince of refined fun. S. Platt Jones is a prodigal of drill mimicry. He gets under the crust. He "gets" every one, from the very young to the very old.

Chautauqua will be held at Stanfield, July 5, 6, 7, and 8.

Jackson and Bodkin, enterprising farmers on the project, shipped a load of hogs to Portland by boat on June 7, and dropped in at Brownell's Store!

Oregon Normal School Summer School

Information
Extension of the Oregon Normal Summer School to held at
PENDLETON
For Six Weeks Beginning June 21, 1920.

Arrangements have been made whereby an extension of the Oregon Normal School will be held at Pendleton for six weeks, beginning June 21, 1920. The faculty will be composed of members of the regular Oregon Normal School Faculty and other excellent instructors.

Special methods in the different subjects for all the grades from one to eight inclusive will be given as well as methods for rural schools.

Those wishing to take the elementary teachers' training course may take the six weeks at Pendleton and then six weeks at Monmouth, beginning Aug. 2, or the full twelve weeks may be taken at Monmouth.

The same credits will be given for work taken as is given in the Summer School at Monmouth.

For information regarding places to live in Pendleton, applicants should write to Supt. H. E. Inlow, the director of the Pendleton Summer School.
