Advertising the Chautauqua

C. Brockman was down from Stanfield Tuesday, advertising the Chautauqua which will be held in Stanfield, July 5, 6, 7, and 8. Season tickets are on sale at Sissel's and Hitt's in Hermiston. Adult tickets are \$2.20 including war tax. By purchasing a season ticket you save \$3.19 on the deal, and if you only attend three performances you also save money by buying a season ticket. Students tickets for 14 years old or over will be \$1.38; child tickets, 14 years old or under, \$1.10.

Iceless refrigerator demonstration at Sappers' Inc. Saturday, June 26.

Notice

The White Star Bus Line will discontinue the run between Hermiston and Pendleton until the highway is open.

White Star Bus Line.

Taken Up

Notice is hereby given that the undersigned has taken up and holds at the Haddock ranch, six miles northeast of Hermiston, the following described animals: One brown mare about 12 years old, weight about 1300 pounds, branded half circle over an S on the left shoulder; one bay horse about five years old, weight about 1400 pounds, branded with a YBar on the right shoulder. Has been at my place about seven days. The above described animals will be sold at public auction to the highest bidder for cash in hand on the 6th day of July, 1920 at 2:00 p. m. at the above named ranch. 40-41-p T. H. Haddock.

All automobile drivers, regardless of whether they own the car or not, will need a license to drive. Any one under 16 years cannot drive, but may obtain a beginners license. The eyes will be examined before license is issued.

Reclamation Service
A. P. Davis, director.
F. E. Weymouth, chief engineer.
J. B. Beadie, director's assistant.

Others
J. A. Gallivan, Jr.
A. K. Barta, stenographer.

LEADS IN MINERAL WEALTH

United States Easily First in Metals of Greatest Importance to the World's Industries.

This country of ours possesses more mineral wealth than any other nation, though Great Britain (including what she controls) is a close second.

We lead the world with 37 per cent of all the iron and 35 per cent of all the coal. These, of course, are most important. We own or control 72 per cent of all the petroleum.

Copper is the great American metal. We produce 69 per cent of the entire world's yield of that invaluable substance. Of lead we produce 49 per cent and of zinc 32 per cent.

England is away ahead of us where gold is concerned. We produce only 23 per cent of this precious stuff, whereas Great Britain's output amounts to 63 per cent.

On the other hand, we claim 52 per cent of the silver—the Mexican output being under our commercial control—and it is actually in the power of our government to make the market price of the white metal whatever Uncle Sam chooses.

Of the world's sulphur we produce 65 per cent. But we have no tin worth mentioning (a serious misfortune) and little potash. Now, however, the potash supply is no longer controlled by Germany, territory recently relinquished to France containing a large part of the deposits of that mineral salt—Philadelphia Ledger.

ADOBE AS BUILDING MATERIAL

Experiments Have Shown, It is Claimed, Durability of This Old and Inexpensive Material.

Adobe, the oldest known building material in southern California, is due for a revival, according to John W. Chard, Santa Barbara architect. He asserts that if properly prepared this native material can be used to very considerably cut the cost of building. "Experiments," says Mr. Chard, "have shown that adobe is the least affected by changes of temperature among all the building materials. Tests show that adobe bricks register no more than six degrees difference between February cold and extreme September heat. As a building material it is far stronger than is generally supposed, and develops a compressive strength as high as 400 pounds to the square inch.

"The proper plaster protection will insure an adobe wall against deterioration. Hard cement plaster thoroughly anchored into the walls and treated with an all-mineral water-proofing compound will give adobe walls great durability.

"Adobe is wet soil mixed with straw, cast into molds of required size and left to dry in the sun. As a building material adobe is everlasting, soundproof, nonconductive and fireproof, always of normal temperature, and is cool in summer and warm in winter."—Los Angeles Times.

TROUBLE FOUND IN AMMETER

High or Low Rate of Discharge Shows That Battery It Not Getting Proper Current.

When the ammeter shows a rate of charge or discharge very much higher than usual it may be accepted as an indication that there is a cross somewhere, so that the battery is not getting the current intended for it.

REPAIRING TEAR IN CAR TOP

Use Woolen Yarn to Draw Edges Together, After Which Apply Material With Cement.

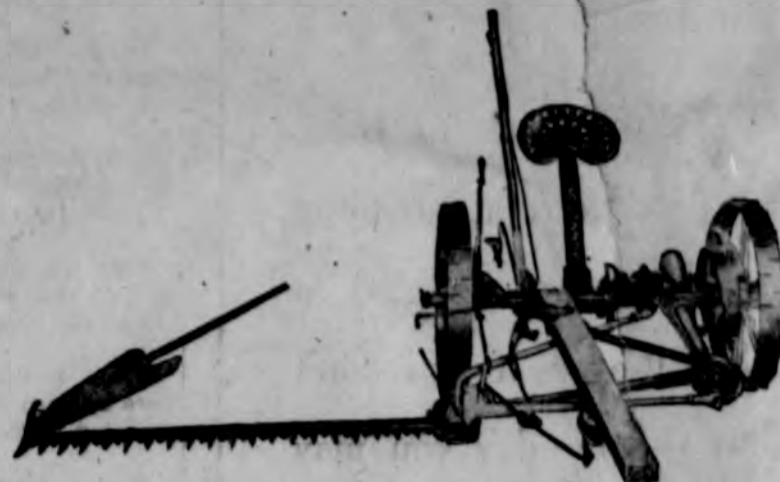

To mend a tear in the top it is best to use woolen yarn to draw the edges together, after which a top material similar to that of the top is applied with rubber cement, set by the vulcanizer.

Iceless refrigerator demonstration at Sappers' Inc. Saturday, June 26.

Mrs. Hammond of Butter Creek went to St. Anthony's hospital in Pendleton last Monday. Dr. and Mrs. Waincott accompanied her.

COLUMBIA NEWS NOTES

SPECIAL CORRESPONDENCE

Wind on Tuesday prevented work in the hay fields, but as there was not a great deal of the first cutting ready to stack on account of the weather, the work was not retarded by the wind to any great extent. The cool days were followed by a great change in temperature Monday, the thermometer reaching 100 degrees in the afternoon and Tuesday wind came on in regular form.

Mrs. Anna Sapper has sold her fruit farm to J. W. Tabor, the gentleman already having possession. With a smaller farm to care for he will devote a great deal of his time to bee raising, this business being one he has followed for several years.

It is reported that a deal is on for the sale of the Tabor place but has not yet been closed. John Pennington and son Harold who have been employed in this vicinity for some time, left Tuesday for Seattle where they will set sail for Alaska and take up land in the Knik river valley.

Frank Waugaman was elected school director and Henry Ott clerk of the board at Monday's election. The principal for the coming year who was engaged recently is Wm. McQueen of Looking Glass, of this state. The teachers are now all secured for the coming year.

The Neighborhood club had their last meeting at the home of Mrs. Banks, about 14 ladies being present. A pleasant afternoon was passed over the usual contests, refreshments, etc.

Plans were formed for a big lawn social to be held in Columbia, the place to be decided on later, on July 16th. A novel feature, and a pleasant one, will be the brilliantly lighted lawn which Mr. Baker, the Delco light man will arrange or the club. No one should miss this affair as an unusual good time is to be had. The club will meet July 7th at the home of Mrs. Lloyd.
