SHERWIN-WILLIAMS HOUSE PAINT SWP

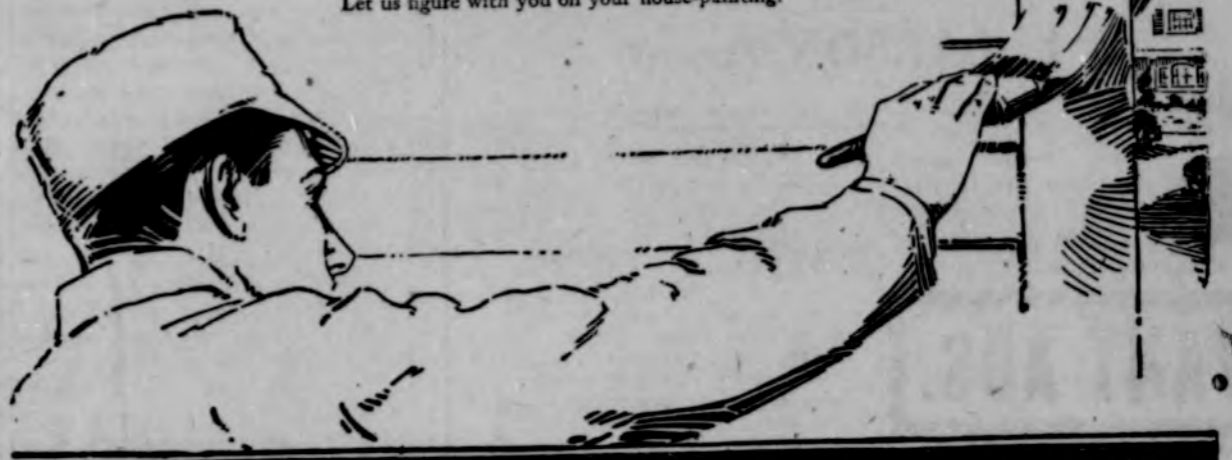

How SWP cuts painting cost

The only way to buy paint economically is to forget gallon price and figure costs by area covered and years of life.

SWP covers one-third more area than paints which are cheaper per gallon. It lasts twice as long without repainting, so requires half the material and costs half the labor price (for painting and repainting).

So price per gallon means nothing. Area covered, weather resistance, and years of life are the real things that determine price economy. On that basis SWP is the cheapest per-gallon outside paint you could buy.

SWP has been the leading prepared house paint for half a century. You will find a complete line of it at our store. Let us figure with you on your house-painting.
