TO THE VOTERS OF HERMISTON
 As announced in these columns last week I have decided to become a candidate for the office of City Recorder, therefore I ask your favorable consideration at the election to be held November 2nd. Since 1912 I have served your interests as best I could as City Councilman without compensation. I believe this experience coupled with my clerical ability and office equipment places me in position to ask your support in the coming election. I assure you it will be appreciated.

FLY PROTECTION FOR STOCK
 Destroy Larvae or Maggots, Remove Breeding Places and Use Fish Oil Repellent.

There are three ways in which animals may be protected from flies. One is by destroying the larvae or maggots from which the flies develop; another is to keep the stable or barn dark and cool, as flies do not usually bother the animals under those conditions, and the other way is to apply an oil or spray to the animal which acts as a repellent. The breeding places for the flies are the decaying straw and manure piles, where the flies live over the winter and where they propagate during warm weather. The minimum amount of these around the barns will help to minimize the number of flies. An oil preparation which can be used as a repellent on the animals can be made as follows: One gallon of fish oil, two ounces of oil of pine tar, two ounces of oil of pennyroyal, one-half pint of kerosene.

DAIRY

DETAILS OF COST OF MILK

Department of Agriculture Has Been Collecting Facts and Figures for Several Years.

What does it cost to keep a cow for a year or to produce 100 pounds of market milk? To answer this question in terms of labor, feed, and other cost factors the dairy division of the United States department of agriculture has been collecting for several years facts and figures from various sections of the country. The results for northwestern Indiana, typical of many farms supplying the Chicago market, are now available in bulletin form. In collecting the information the department worked in co-operation with Purdue university.

To give permanent value to the figures, the investigators determined the cost of milk production chiefly in terms of feed, labor, and other important factors. Thus by applying current values to any of the items a dairyman, or anyone else interested, may compare his present costs with those published by the department. Practically farms owned or handled by resident farmers were used in the investigation.

Among the outstanding results are the following:
 The unit requirements for keeping a cow one year were: Concentrates, 1.02 tons; dry roughage, 3.64 tons; hauling and grinding concentrates, 1.53; bedding, 0.36 tons; pasture, 1.36 acres; human labor, 164.5 hours; horse labor, 16.2 hours; overhead and other costs, \$27.11. Credits other than milk: Manure, 6.8 tons; calves, 0.87 of one calf.

Feed and pasture comprised 57.6 per cent of the total cost of production; labor, 19.5 per cent; overhead and other cost, 22.9 per cent. The total cost was offset 22.3 per cent by calves and manure. A different percentage relationship would exist, however, if present prices for the various items were used.

One Way of Lowering the Cost of Milk Production is by Having Cows of Good Breeding and High Producers.

clearly by comparative figures for the 25 herds studied. The owner of one herd of cows averaging 8,200 pounds of milk annually had to feed and milk nine cows to obtain the same quantity of milk as that given 12 average cows in other herds.

FLY PROTECTION FOR STOCK

Destroy Larvae or Maggots, Remove Breeding Places and Use Fish Oil Repellent.

There are three ways in which animals may be protected from flies. One is by destroying the larvae or maggots from which the flies develop; another is to keep the stable or barn dark and cool, as flies do not usually bother the animals under those conditions, and the other way is to apply an oil or spray to the animal which acts as a repellent. The breeding places for the flies are the decaying straw and manure piles, where the flies live over the winter and where they propagate during warm weather. An oil preparation which can be used as a repellent on the animals can be made as follows: One gallon of fish oil, two ounces of oil of pine tar, two ounces of oil of pennyroyal, one-half pint of kerosene.

MOTORTRUCK AIDS DAIRYMEN

Vehicle Cheapens Cost of Haul, Speeds Up the Delivery and Saves Valuable Time.

Dairymen everywhere have found the motortruck a great help in delivering their products to their patrons. It cheapens the haul, speeds up the delivery, and saves much valuable time and labor. It also insures the delivery of the dairy products in much better condition which will insure better prices and better satisfied customers. The only wonder is that more dairymen have not purchased motortrucks.

Know Cow's Profitableness. Test your cows and know whether they are eating up your profits as well as your feed.

LIQUOR DEALERS ASK FOR FUNDS TO AID CANDIDATE COX AS A PRONOUNCED "WET"

(Verbatim copy of letter presented to Senatorial Investigating Committee, at Chicago, by Chairman Will H. Hays of Republican National Committee.)

Care of
 The President
 649 Broad Street, Newark, N. J.

HELP ELECT MEN WHO WILL KILL PROHIBITION
 July 22, 1920.

Cabain Bros.,
 Dear Sir and Brother:

The organized liquor trade of New Jersey has set out to do its part toward the election of James M. Cox as the next President of the United States and it becomes my duty to call upon you to help. More than that we are going to fight as we never fought before to keep the hirelings of the Anti-Saloon League out of office; to elect Congressmen in the twelve Congressional districts of the State who will vote to amend the Volstead Act so as to permit the sale of light wine and beer; to elect Assemblymen and State Senators who will keep New Jersey from ratifying the Eighteenth Amendment and prevent the passage of any law concurring in the Volstead Act in its present form.

The nomination of Governor Cox of Ohio for the presidency by the Democrats is a big victory for our interests and it can be attributed to a great degree to the activity of our trade organizations here in New Jersey and throughout the nation. Governor Cox is a pronounced "wet" and he can be relied upon to approve an amendment to the Volstead Act as suggested above. It is now up to our trade organizations to stand unitedly behind the ticket of Cox and Roosevelt and roll up such a majority as will show convincingly that the public well is in our favor. Are you going to help? Of course you are.

This is going to be the greatest political fight in the history of the United States. Your liberty and mine has been taken from us. Our business has been unjustly confiscated. The rights of the people have been seized and they are lined up with us in the mighty struggle that is soon to be decided by the battle of the ballot.

The recent decision of the United States Supreme Court has thrown the question of Prohibition squarely into politics. It is the vital issue in the Campaign that is now under way. The prohibitionists tried to keep the question out of the campaign. They feared the vote of an outraged and indignant public. It is up to us—members of the organized liquor trade—to force the fight. That is just what we are doing.

We have issued the challenge. The Anti-Saloon League is forced to fight. It has made an appeal for a \$30,000 fund to elect dry Congressmen who will uphold the Volstead Act and dry candidates to the State Senate and Assembly to force ratification of the Eighteenth Amendment on New Jersey. There is no question about the Anti-Saloon League's ability to raise the amount asked. How much can we raise?

We must have money at once to carry on the work that we have planned. Do not think for a moment that there is plenty of time to give between now and election. The fall will be too late. Money must be had immediately if we are to maintain our headquarters and continue the propaganda that is necessary in the drive to win public opinion. This is the second appeal that I have sent you. The first you evidently overlooked. I would not bother you now if it were not for the fact that your own interests hang in the balance just as much as mine. Let me beg of you to remain loyal to the cause to the finish. Make this your last contribution if you will but give—give something.

Your record on the roster of your local associations and also on that of the State League showed that you have been loyal and regular in the past. Do keep that record unsullied to the very end. I have always had your co-operation in the past please let me have it now for the Federation is to put up a bigger fight than it ever made before.

So that we may know at once just what our resources are, may we not ask you to promptly return the inclosed card filled out with your remittance.

Jump in and help us fight. Give as much as you can afford. This is not merely a battle to save your business but one to preserve something more sacred namely, your personal liberty.

Yours fraternally,

 PRESIDENT.
