WOMAN IN HER NEW SPHERE

Writer Asserts She Has Ceased to Be Sentimental and Is Armed for World's Work

"Women no longer marry for a home and a provider," writes Frances Hodgson Burnett in McCall's.

"To begin with, woman has largely ceased to be an amateur and a sentimentalist, and she has also largely ceased to be regarded as either one or the other or both, as the natural and inescapable result of her sex. Such paid work as she undertakes to perform is not approached in the trembling hope that incompetence and inexactness will be overlooked 'in a woman' because a woman called upon to be self-supporting must necessarily be regarded as an unnatural and pathetic object.

"Women have begun to support themselves as a matter of decency and preference—from which has evolved the fact that they have ceased to marry merely to have 'someone to provide for them.'

"Coming into competition with men, in her search for self-support, the woman whose portion it was to retain her despairing hold upon hope by studying more 'to please' has found it incumbent upon her to supply herself—among other working tools—with men's logic, men's restraint and men's knowledge of the necessary ignoring in the workaday world of the personal influence which is a matter of gender. Beauty and gender still exist, but they are no longer the sole working assets."

PHOTOS NOW SENT BY CABLE

Their Successful Transmission Has Passed Beyond the Range of an Experiment.

Photographs have been successfully cabled across the Atlantic. The first pictures actually transmitted were probably those taken in New York of the recent international yacht race and reproduced a few hours later in a London newspaper. There are several methods of transmitting photographs by wire and even by wireless electricity, but the system followed in cabling the yacht pictures is probably the best. The negative containing the photograph is "coded," or prepared for transmission by an ingenious device which reduces the picture to an arrangement of messages which resemble an ordinary cable code and can be transmitted as such. This message can be handed into a telegraph office for transmission like any other message. On being received on the other side of the Atlantic this message is placed in a machine resembling an ordinary typewriter and is in turn reproduced by a series of holes in a long tape. The tape is then placed in the reproducing machine with an undeveloped plate and after being transmitted the plate is placed in a developing bath which reproduces the original picture in every detail. Some details are lost in the sending, but it is promised that the machine will soon be perfected and the long distance transmission of photographs will be a commonplace.—Boys' Life.

Fossil Whale Unearthed.

A rare fossil, that of a Miocene whale, has been found by Dr. E. L. Packard, professor of geology at the University of Oregon, near Eugene, Oregon.

The relic of prehistoric times, which was found in the cliffs along the beach at Newport, Ore., is, Doctor Packard believes, the finest specimen of fossil whale yet found in North America. Such petrified skeletons are very rare and the extreme age of the recent find makes it of particular interest to scientific men.

Only the skull of the creature has been exhumed from its rocky bed and Doctor Packard is now preparing it for addition to the Condon geological museum of the University of Oregon. The bones are rather small, indicating that the leviathan was young, or, which is more probable, that the leviathans of the Miocene age were markedly smaller than those of the present day.

Fish Not Affected by Tar.

The old question of the effect of tarring roads on fish in neighboring streams has been settled anew at Chesham, England. The main road of the town was tarred last winter for the first time, and this has been followed by the death of large numbers of trout and other fish in the River Chess. A special commission of investigation, however, has now reported that the fish destruction was not a result of the road tarring or of any epidemic disease. The real cause appears to have been poisoning by a temporary increase in the industrial pollution of a ditch which discharges into the river and is practically an industrial sewer.

Thrift in the Paint Brush.

A little attention to details on the part of the housewife will prolong the life of utensils or utilities which cost considerable money to replace those days. The varnish on carpet sweepers soon wears off; unprotected as it is from moisture and variations in temperature, it is likely to fall to pieces. This can easily be prevented by applying a coat of stain finish, obtainable at any paint store. Washing machines should also be protected from variations of temperature and moisture by applying a coat of colored enamel when needed. Porch furniture, screen doors, baby carriages and folding screens should all be thus cared for.—Thrifty Magazine.

The High School Mirror

Vol. 1

Devoted to the Interest and Development of the Hermiston Schools

No. 11

The boys and girls ring tossers returned home from Pilot Rock Saturday, with one victory and one defeat on the record for the Purple and Gold. The girls proved their superiority by a score of 23 to 4; while the boys were only able to stack 40 against their opponents 46. Every one reported a delightful trip barring blowouts, and roads, getting stuck in the mud, and trying to make a Ford run without gasoline.

The pupils of the upper grades and high school are selling tickets for Mr. Klemme's lecture Friday night.

Two of the boys are practicing for the dramatic sketch to be given next Wednesday night which is High School night at the Play House.

Dewey Payne was absent from school two days while visiting his parents near Echo.

The semester examinations are to be given next week.

Max Warriner was quite puffed up last week over the impression that

he was suddenly becoming quite popular among the girls, until he discovered that it was only his lovely new neck-tie attracting their attention.

The High School basket ball schedule up to date is as follows:

Hermiston at Milton, January 21.
Pilot Rock at Hermiston, January 28.
Ione at Hermiston, February 5.
Milton at Hermiston, February 11.
Hermiston at Heppner, February 26.
Hermiston at Ione, February 25.
Heppner at Hermiston, March 4.

The High School will play the American Legion a game of basket ball Thursday night. The game will be a double header.

Julius Gimble, a member of the freshmen class has left school and has enlisted in the navy. He is now in training at the Naval School at Mare Island, California.

The class in Commercial Geography has been busy writing to different manufacturing concerns for educational exhibits. Up to date

they have secured a spice exhibit from Folger & Co., one from the Esterbrook Steel Pen Co., showing the process in making pens; a corn products exhibit, showing what is made from Indian corn; one from Dr. Price's extracts, and a beautiful glass covered case from the Crescent Co., containing samples of every one of their spices and flavoring extracts. The class is now writing compositions on subjects in connection with their work.

Grade News

The fourth grade beat the fifth grade Monday noon in a game of indoor baseball. The score was 22 to 6.

The fourth grade is learning music by note.

Nineteen were neither absent nor tardy for the month of December in the third grade.

Twenty-three were neither absent nor tardy for the month of December in the sixth grade.

Genevieve Mills was absent from the high school Tuesday.

A new foot ball has arrived which is being greatly enjoyed by the boys.

Kenneth Merrick has withdrawn from the fourth grade to go to Walls Walla.

The primary room is greatly interested in clay modeling this week. This work deals principally with Eskimaux.

Mrs. Norton visited the primary room Monday.

The east bus route has been extended through the fourth unit.

Little bits of knowledge.
Little bits of mirth.
Make the Umatilla High School,
The jolliest place on earth.

F. B. SWAYZE,
Directors.

BROWN AND GOLD LEAVES
Umatilla High School
By Lotys Davis

The boys of the high school and the seventh and eighth grades have formed a very enthusiastic cooking class. Their lessons will soon begin under the instruction of Miss Rix.

Mizner Wilson of the fifth grade has gone to La Grande.

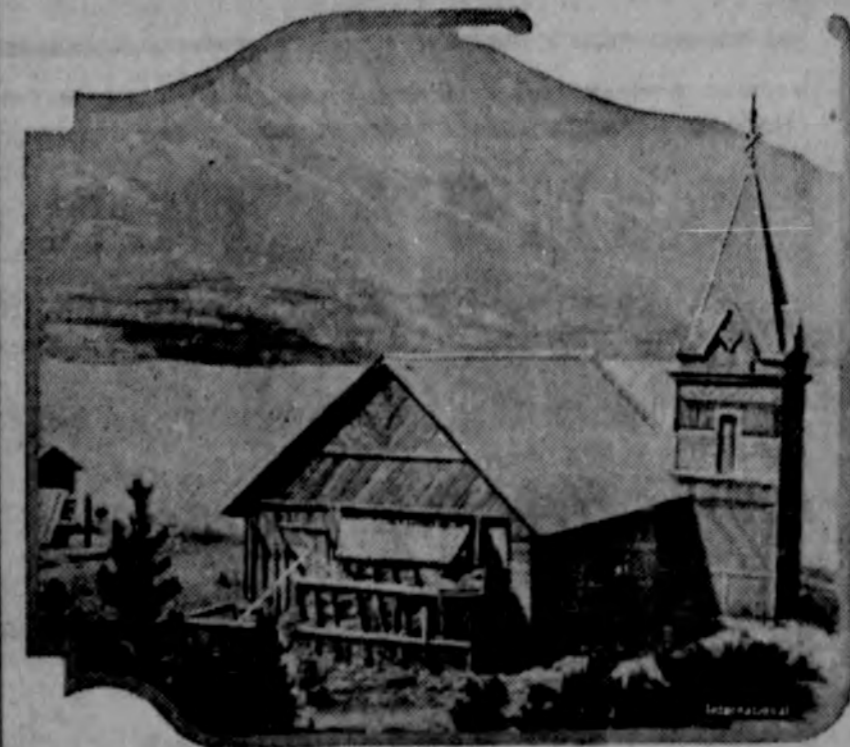

The girls of the cooking class held a meeting Monday for the purpose of disposing of the proceeds of the recent candy and food sales. It was voted to be given into Mr. Benjamin's keeping until such time as it will be needed for the purchase of athletic supplies. Three dollars above expense was made at each of the two sales, which added to the original capital of \$10.00, making a total of \$16.00.

Pajamas on the Board Walk

Led by a marquis, whose name is withheld, male visitors to Marlarkeke, near Ostend, Belgium, have revolted against the conventional garb, and are appearing on the walks attired in cool pajamas, as the photograph shows.

Remnant of a Famous Gold Rush

This ruined old Russian church at Lake Bennett, Alaska, is all that remains of the city of 20,000 people which thrived at the head of the famous Chilkoot Pass during the gold rush of 1898. It was there that the prospectors outfitted and made rafts and canoes for the trip on the Yukon river.
