Odd Names for Fish.
 The bass of the South is the red
 fish; then we have the striped bass
 which has several vernacular names,
 says the American Forestry Magazine.
 All of our sunfishes, of which the com-

 an example, have been designated as
 various kinds of basses; and there is
 the brassy bass, the calico bass, often
 confused with the crappie; the silver
 bass is another name for the "moon-

Explaining the Change.
 Little Betsy, her mother, and new
 daddy returned to the city after living
 on a ranch for several months. The
 child went to visit the Sunday school
 she had attended before she went
 away. The teacher was much surprised
 to see her and exclaimed, "Well, if
 here isn't Betsy McCann!" With a
 very indignant gesture the child re-
 plied: "No, this isn't Betsy McCann—
 it's Betsy Bryant; my mamma and I
 got married again."

High Cost of Flirting.
 Mrs. Exe—"Your new hat is lovely,
 my dear. But \$75. I thought you
 said you were going to get a much
 cheaper one." Mrs. Wye—"Well, I
 was, but my husband was with me
 and when I saw him flirting with one
 of the salesgirls I took this \$75 hat
 just for revenge."—Boston Transcript.

Glass Washboards Lessen Friction.
 A glass washboard, although it
 breaks more easily, is to be preferred
 to a metal one because the friction on
 the clothes is less. However, if a
 metal washboard is used it should be
 thoroughly dry before being put away,
 so that it will not warp or attract
 waterbugs.

Communing With Herself.
 One day while mother went to town
 Bobby was left in grandma's care,
 who, always being alone, had devel-
 oped the habit of thinking aloud. Af-
 ter watching her going about her work,
 talking to herself the while, Bobby
 innocently asked: "Is you tellin' your-
 self somesing, grandma?"

A husband was denied a divorce
 because he couldn't remember the date
 of his wedding. The judge probably
 thought that the man who could go
 and forget that wasn't suffering much

POULTRY

PLAN TO INCREASE POULTRY
 Department of Agriculture Recom-
 mends Careful Selection of
 Breeding Stock.

The campaign that has been inaugu-
 rated by the United States Department
 of Agriculture to stimulate and in-
 crease poultry production along more
 efficient lines is divided into the fol-
 lowing phases:
 Careful selection of breeding stock
 to reproduce a larger percentage of
 good types of profitable producers.
 Early hatching, so as to produce fall
 and winter layers.

To confine mother hens to brood
 coops for at least two weeks after the
 chicks are hatched.
 To provide free range for both grow-
 ing stock and layers in so far as pos-
 sible to stimulate growth and produc-
 tion and conserve food consumption.

To preserve eggs for winter use.
 The production of infertile eggs as
 soon as the breeding season is over.
 Disposing of surplus cockerels as
 broilers to conserve grain.

To discourage the marketing of all
 profitable hens of the general purpose
 class until the end of their second
 year, and of the Mediterranean or egg
 class until the end of their third lay-
 ing year.

To encourage the careful selection
 of all hens in order to eliminate the
 unprofitable producers.
 To discourage the marketing of all
 profitable pullets as broilers and of all
 well-matured pullets for meat.

To encourage the caponizing of cock-
 erels only when free range can be
 provided and a special nearby market
 afforded.
 To encourage back-yard poultry
 keeping, especially among city and
 suburban dwellers, thereby utilizing

Leghorns Are Well Adapted for Pro-
 duction of Eggs.

table scraps for the production of
 fowls and eggs for home consump-
 tion.
 To encourage turkey, duck and geese
 raising when circumstances are
 favorable.

TO KEEP HENS COMFORTABLE
**House Must Be Kept Dry, Well Ven-
 tilated and Sufficient Space
 for Scratching.**

The poultry house is both the
 home of the hen and the factory
 where winter eggs are produced, and
 unless it provides suitable living and
 working conditions the hen cannot
 be expected to lay well. The chief
 requirement is that the house must
 keep the birds comfortable. To be
 comfortable the house must be dry,
 well ventilated, well lighted and have
 sufficient floor space to provide exer-
 cise by scratching. Dryness is in-
 sured by having a good roof, keep-
 ing the floor of the house higher than
 the surrounding ground, and by pro-
 viding good ventilation. Ventilation
 must supply plenty of fresh air with-
 out drafts. This is secured in the
 poultry house by having the south
 side relatively open and the other
 three sides absolutely tight. The im-
 portance of light in the poultry
 house has not been properly empha-
 sized in the past.

FERTILE EGGS FOR HATCHING
**Maximum Fertility Not Likely to Be
 Obtained Before Two Weeks
 After Mating Fowls.**

Matings should be made at least
 two weeks before beginning to save
 the eggs for hatching. If less time
 is allowed, the maximum fertility is
 not likely to be obtained. It is often
 desirable to mate even further ahead
 than two weeks so that a few eggs
 can be incubated for five or six days
 to see whether they are fertile. If
 these eggs are not fertile, there is
 still time to change the male bird
 and thus be sure of fertile eggs for
 the earlier hatches.

FRESH AIR VERY IMPORTANT
**Not Advisable to Close All Window
 at First Approach of Cold
 Weather in Fall.**

Don't close all the windows in the
 henhouse at the first approach of cold
 weather, but leave some of them
 open. If the wind blows in, put a
 piece of burlap over the open space
 to keep out the wind, but let in air.

No Time for "Common" Lunch.
 Buddy was eating as hearty a lunch
 as usual, when sister said: "Buddy,
 why are you eating so much common
 lunch? Don't you know we're going
 to a party this afternoon?"

Not Guilty.

 long as you want and witness a vaude-
 ville show of an hour or more dura-
 tion, and see a Metro movie. A mat-
 inee is given daily, and two perfor-
 mances at night, with continuous shows,
 Saturdays, Sundays and holidays, the
 price within the reach of all—11c for
 children and 25c for adults at the matinee;
 17c for children and 39c for
 adults in the evening. The Hippo-
