**MOTHER EARTH CHOSE WELL**  
Old Lady's Decision on Green for a Coloring Much More Than Accidental.  
Why did Mother Earth choose a dress in green? The earth was not always green. Scientists say that once it was as naked as the moon; but there came a day when the weather grew cool enough to demand clothing, and at that time, no doubt, this maternal planet began to look about to choose a color scheme for her dress. Why she chose green is not on record, but that she chose it with her whole heart every pleasant place of creation testifies.  
Scientists explain that this is merely a natural phenomenon, the color being chlorophyll pigment, turned green by action of the sun. But why it did not turn blue or red or black, no scientist knows. About all they can say is that Mother Earth wanted a green dress, and she got it.  
Green is a restful color. Oculists say that of all colors green is the most friendly to the optic nerve. In lands where eternal snows or eternal white sands flash up their glaring reflections, men have to shade their eyes or go blind. But green never bothers the eye. One can stare at a forest in the face all day with impunity. Nature's greens never go on your nerves, and they never quarreled with any other of nature's colors and tints.  
The professional mixer of paints knows that fierce color discord can easily be created by a misplacing of green. But nature never misplaces it. Even blue stands without tiring, cheek by cheek with nature's greens. Larkspur and lobelia go quietly arm in arm with their respective foliage. A rose of any tint or color is best set off by a green rose leaf. Every spring or fall color, pale or florid, will shade pleasantly into green on the very same leaf.  
Imagine the grass of the field and the leaves of the forest created blue, or magenta, or scarlet, instead of green! Some speculative scientists think the foliage of the planet Mars is red, and that the people there are seeing red continually.—Louisville Courier-Journal.

**Young Boy Grows Beard.**  
Malakoff, Tex. — Little Jimmie Vaughn, five years old, has a black beard as heavy as that of most men at forty. He began sprouting the set of whiskers two years ago and now he has to have a regular shave at least twice a week.  
Doctors believe the hair on the child's face is an unnatural growth, and will come off soon, but barbers who have shaved Jimmie say his beard is as tough as an old man's and is on him to stay.
