The accounting in connection with the general contract with the Hermiston Irrigation District was reviewed and brought up to date.

The Story of Our States

By JONATHAN BRACE

II.—PENNSYLVANIA
THE second state to adopt the Constitution was Pennsylvania. Its area of 45,126 square miles is larger than the combined New England states, except Maine, with New Jersey thrown in for good measure. Its name means "Penn's Woodland" and was so named by King Charles II, who granted this territory to the Quaker, William Penn, and named it in commemoration of Penn's father, who had been a distinguished admiral and on terms of peculiar friendship and intimacy with the royal family. This grant was made in lieu of £16,000, which the king owed Admiral Penn. On this basis it originally cost about \$2 a square mile.

Pennsylvania has assumed such an important place among the states that it is often called the Keystone state. This term was probably derived originally because her name was carved on the keystone of the bridge over Rock creek, between Washington and Georgetown. Later on it was applied on account of the great importance of the state in national elections. Its delegation to congress totals 38, second only in size to that from New York, and Pennsylvania accordingly has 38 presidential electors.

William Penn first came over to America in 1682. The following year he laid out the city of Philadelphia, or "Brotherly Love," which was named after a biblical city in Asia Minor. As Pennsylvania was the only colony without a seacoast, Penn obtained from the duke of York the control of Delaware, and until the Revolution these two provinces were under the same proprietary government. Quarrels with Maryland over boundaries caused a formal survey to be made by two surveyors, Mason and Dixon, and it was this which became famous during the Civil war as the Mason and Dixon line, the dividing mark between the slave and the free states. (© by McClure Newspaper Syndicate.)

J. Skovbo returned Sunday morning from Portland where he attended the Beekeepers Convention.

NOTICE FOR PUBLICATION
Department of the Interior, U. S. Land Office at La Grande, Oregon, March 22, 1921.

Notice is hereby given that William J. Bault, assignee of Rufus L. of Martin, assignee of John N. Smith, Hermiston, Oregon, who, on Dec. 21, 1909, made Reclamation Homestead Entry, No. 07424, for Farm Unit "J" of NE 1/4, or NE 1/4 NE 1/4, Section 27, Township 5 N., Range 29 E., Willamette Meridian, has filed notice of intention to make final proof, to establish claim to the land above described, before W. J. Warner, U. S. Commissioner, at his office in Hermiston, Oregon, on the 3rd day of May, 1921.

Claimants names as witnesses: Lynds D. Lay, L. H. Pearson, William F. Hannan, and Jens J. Skovbo, all of Hermiston, Oregon.
C. S. Dunn Register.

Call For Bids

Notice is hereby given that sealed bids will be received at the office of the City Recorder of Umatilla, Umatilla County, Oregon, up to and including five o'clock in the afternoon on the 18th day of April, 1921, for the improvement of that portion of Third street lying and being between the center of "A" street and the East line of "F" street, in said city of Umatilla, Umatilla County, Oregon, in accordance with the plans and specifications of such improvement prepared by E. I. Davis, City Engineer, and now on file in the office of the Recorder of said City, where the same may be examined. Each bid must be accompanied by a certified check for 5 per cent of the sum bid, made payable to the Mayor of the City of Umatilla, to be returned to the bidder, if unsuccessful, and to be forfeited to the City of Umatilla if the bid is successful and bidder fails to enter into the contract in accordance with the terms of his bid and of the ordinances and resolutions covering such improvement.

The City Council reserves the right to reject any and all bids.
Dated March 16th, 1921.
B. McKenzie, City Recorder. 27-4tc

An Opportunity To Brighten Up

Brightening up the home is one of the chief pleasures of the housewife. A bright, cheerful home makes for contentment and comfort.

There are marred and scratched pieces of furniture—the worn floor and stair treads—the woodwork, which needs refinishing—the ice chest—the kitchen cabinet and many other places about the home can be brightened up with

Article No. 1 THE PURPOSE OF OIL

Machinery of any kind transmits power by movable members. These parts must slide in guides or bearings and they work most efficiently when their motion excites the least frictional resistance. Their finely ground surfaces appear perfectly smooth to touch and sight, but under the microscope show marked ridges and irregularities. When two such surfaces come into direct contact at high speeds and under heavy pressure they grind and abrade each other like two pieces of sand paper. No machinery can long survive such wear and tear. To protect the finished surfaces, it is necessary to insert between them a film of oil. This oil cushion keeps apart the opposing minute ridges. When the parts move, they split the film into "tangential" layers which slip or flow upon each other with little resistance. Thus the basic purpose of lubrication is accomplished by substituting the easy internal friction of oil for the destructive sliding friction of metal.

It is more important to maintain this oil film between the bearing surfaces than to keep fuel in the gasoline tank. But if the oil is of uneven or incorrect quality, contains impurities, or evaporates quickly, the delicate film is easily destroyed. Then the metals come into partial or complete contact, are scored, and sometimes even fused by the heat.
