**OREGON EXPERIMENT STATION—  
BLAZED NEW SPRAY WAY**

"Whole Economy of Spraying Based  
on Practice Developed at O. A.  
C.," Says Specialist

Oregon Agricultural College, Cor-  
vallis, April.—How Oregon and other  
western growers got the bulge on  
their eastern competitors in produc-  
ing high quality fruit by superior  
spraying is told by V. I. Safro, field  
manager of the Tobacco By-Products  
and Chemical company, Louisville,  
Kentucky.

"The whole economy of spraying  
throughout the country is based on  
practices developed at the Oregon  
station in 1908," he declared. "Up  
to that time it was not at all unusual  
for the growers to spray his trees  
four times in quick succession for  
control of as many different insect  
and disease troubles.

"To save this extra labor and gain  
time—for often if spraying is not  
done within a short, fixed period it  
is wasted—the station developed the  
combination spray. The first nicot-  
ine, lime-sulphur, lead arsenate  
spray ever successfully used was  
worked out here.

"This new principal reached its  
high water mark of application three  
years later at Hood River where Iron  
sulphid was successfully added to the  
combination."

Lime-sulphur got its great impulse  
as a fungicide here through the in-  
vestigations of Dean A. B. Cordley.

"This great standard spray, often  
in combinations based on the O. A.  
C. findings, is in use not only  
throughout this country, but in  
Australia, New Zealand, South Africa,  
and other parts of the fruit world."

The station is likewise used as au-  
thority by spray manufacturers and  
dealers, and its reports are funda-  
mental in spray study and applica-  
tion generally, Mr. Safro has observ-  
ed.

**FARMERS COLLEGE WEEK  
TO BE HELD JUNE 13-19**

Oregon farmers week, since many  
farmers have reported through the  
county agricultural agents that they  
want it then, will be held at the  
state agricultural college June 13-19.

The date was selected because it is  
a relatively slack season on the farm.  
Roads are fine for motoring and all  
nature is at her prime for travel and  
camping. It will give parents of  
graduates an opportunity to take in  
commencement with formal gradua-  
tion exercises on Monday.

It suits the college program of  
work, coming in between the regular  
three-term summer session calendars  
giving college station and extension  
staff time for farm and home prob-  
lems.

This short and snappy session of  
the college will be in charge of Dr.  
A. B. Cordley, dean of agriculture.  
The whole college staff from "Prex-  
le" down will join in making the  
stay of the rural folk a continuous  
round of profit and pleasure. Many  
hundreds are expected to come and  
enjoy it.

Farmers having land to clear may  
be able to get a supply of picric acid  
for explosives from the 12 million  
pounds surplus now held by the war  
department. The state agricultural  
college has been asked to consider  
the distribution of enough to last till  
June, 1922. The acid is said to be a  
safe and reliable explosive for land  
clearing, and its cost to users will be  
only the expense of carting and  
packing it, with freights and storage  
charges. The college is now at work  
finding out what they will be. If  
the plan is feasible, distribution will  
be undertaken and it is thought the  
cost will be much lower than com-  
mercial charges. It will be distri-  
buted through county agricultural  
agents. Announcements will be made  
later.

Garden slugs or snails which are  
injurious to young plants such as  
lettuce, radishes and cabbage can be  
controlled by placing a bait near  
the damaged plants, consisting of  
lettuce, finely chopped, 16 parts, to  
which is added 1 part of calcium ar-  
senate, sprinkled on the bait. This  
is placed in small piles during the  
latter part of the day as the slugs  
feed at night.—O. A. C. Experiment  
station.

**ANNOUNCEMENT**  
We are pleased to announce that  
PREST-O-LITE Battery Service is  
now represented in Hermiston by the  
Hermiston Auto Co.  
We feel that this appointment will  
be of decided advantage to all users  
of battery equipped cars.  
Semi-monthly inspection of your  
battery is necessary and the adding  
of distilled water, in order to insure  
longer life, this without cost to you.  
Regardless of make of battery your  
car is equipped, we urge you to take  
full advantage of this service.  
PREST-O-LITE batteries are "BEST  
by COMPETITIVE TEST"  
Automotive Battery Service Co.,  
Authorized Distributor,  
Pendleton, Oregon.

**If You Don't Like  
Heavy Repair Bills  
Why Have Them?**

When you are not feeling fit you go to a doc-  
tor or a druggist and get something to brace  
you up.  
The same rule applies to your car. When it  
is not running smoothly it needs a bracer. It  
cannot correct its own defects.  
Furnishing bracers for sick cars is easy for us,  
because the work is fascinating and we like  
it. We correct the little defects as well as  
the big ones. That's what keeps your car fit.  
By coming to us at the first sign of trouble  
you rid yourself of those heavy repair bills  
that try your patience so much.
