COLUMBIA NEWS NOTES

SPECIAL CORRESPONDENCE

The Farm Bureau meeting held at Columbia school house Friday evening was quite successful, about 65 people being present. County agent Fred Bennion gave a report of the farm bureau work accomplished in Columbia last year. The entire executive committee of last year was re-elected, Dairying, Frank Waughman, Boys and Girls club work, Henry Sommerer, Poultry, E. E. Graham, Rodent Control, H. J. Ott, Fruit, F. P. Phipps and Otto Hienl.

Under the dairying project, the committee and leader hope to continue the tuberculosis eradication which was begun last year. Also to begin a testing association and carry on a "Better Sire" campaign.

The work of the other projects will be similar to last year.

After this program was adopted Mrs. J. Udey gave one of her popular whistling solos. Rev. Geo. Clark, the speaker of the evening, gave a very interesting and inspirational address on "Community Pride and Farm Life in General. Mr. Clark emphasized the importance of raising pure bred. "If it is only a cat, have it a pure bred," he says.

The program was followed by a lunch consisting of coffee, cocoa and sandwiches, served by the Columbia ladies with Mrs. F. P. Phipps and Mrs. H. J. Ott in charge. Mr. Bennion hopes to have several of these "Get-together" meetings throughout the year.

There will be a social at Columbia school again this Friday evening. The school children have prepared a short program which will be followed by a debate—"Resolved: That Government Price Control should be adopted in the U. S." Six of the Columbia men, young and old, will handle the subject. This program was to have been rendered at the Farm Bureau meeting but because of other plans it was postponed until this week.

They Appeal to Our Sympathies. The bilious and dyspeptic are constant sufferers and appeal to our sympathies. Many such, however, have been completely restored to health by the use of Chamberlain's Tablets. These tablets strengthen the stomach, invigorate the liver and improve the digestion. They also cause a gentle movement of the bowels. When you have any trouble with your stomach, give them a trial.

Mrs. J. H. Reid entertained at a second party Saturday evening. The guests included Mr. and Mrs. Otto Heim, Mr. and Mrs. Chas. Keller, Mr. and Mrs. F. Peddow and Childs Barham. The evening was spent in playing progressive 500. All reported a very pleasant time.

Madame Elscamper has been sewing at the Otto Sapper home this week.

The social committee of the Neighborhood club met at the home of Mrs. O. O. Felthouse on Saturday.

Mr. and Mrs. Otto Sapper, Helen, and Mrs. Anna Sapper were Sunday callers in Columbia district.

Miss Laura Phipps who is attending Whitman college is coming Friday morning to spend the week end with her parents.

Butter Creek Items. A route has been established and is operated by Mr. Razumson, whereby the farmers are sending milk to the Stanfield cheese factory.

Helston Moore has moved his cattle to Pete Sheridan's ranch, where he will feed for a while. There are about six hundred and fifty head.

Mrs. James Ware was called to Eugene the first of last week because of the death of her son-in-law, Leigh Noel. Mrs. Ware is expected to return soon accompanied by Mrs. Noel.

Mrs. M. E. Warren from near Pendleton is visiting at the home of her daughter Mrs. D. H. Shaw.

Mr. Spain who recently moved here from North Powder, has been confined to his bed the past few days suffering injuries received from a horse.

E. W. Rhea and P. F. Shaw were business visitors at Echo Tuesday.

Earnest Shipley is able to be out again after being in bed a couple of days as a result of a fall while skating on the ice.

Mrs. E. D. Rieman and children are visiting relatives here for a few days.

Field Peas Good Feed. Field peas make good hog and sheep feed and can be grown under dry land conditions. Carletons or bangallas are good varieties Golden Vine and White Canadian are good if the others cannot be obtained. No field peas are successful unless planted early. Every week delay after March 1 to 15 in the lower altitudes, and after April 1 in the higher sections, means a reduced yield.—O. A. C. Experiment station.

Late Planting, Less Oats. Absolute necessity of planting peas and oats and barley early has been shown by experiments throughout the state. The earlier they are planted after the season opens up the better. At the Astoria branch station each week's delay in planting meant practically one-half ton loss. In dry districts the loss is even greater. Peas and oats make good silage, hay, or grain, although they are somewhat susceptible to injury by plant lice.—O. A. C. Experiment station.

The High School Mirror

Devoted to the Interest and Development of the Hermiston Schools

Vol. 2.

No. 19

Mr. Gralapp of the high school faculty was absent from his classes Monday. He was forced to go to La Grande because of the illness of his child. Mr. Voelker took charge of his classes while he was absent.

Last Friday both of the high school teams lost to Pendleton. The girls team to the Pendleton first team girls by a score of 31-3 while the boys, playing Pendleton's second team fared little better, their score being 49-9. Several of the local high school students were up to see the games. The same evening Pendleton's first team boys played The Dalles 39-17.

Friday evening both high school basketball teams will play the teams from Pilot Rock high school here. Fast games are expected, and all who can are urged to be present.

The local debating teams, composed of Doris Swazey and Paul Stockard affirmative and Zona Benschel and Grace Skinner negative, both won from the Umatilla high school teams last Friday evening. This makes Hermiston the winner in this end of the county, as they won 7 points out of a possible 8.

The next debate will be held Feb. 15. At this time either Condon or Fossil's negative team will meet our affirmative here, while our negative will debate the winner of the Pilot Rock-Pendleton debate at that city. If Hermiston should win these debates it will hold the championship of this district.

MOST HAZARDOUS OF SPORTS

Participants in Irish Wild Goose Chase Always in for Danger Real and Thrilling.

The etymology of steeplechase is too obvious to need set explanation. Founders of the sport merely fixed upon a distant steeple and rode straight to it, crossing gallantly, hedge, ditch, piling, turf or timber, pastures, crops, moorland or ridge and narrow—whose riding straightest, came in first and was winner.

But there are few, indeed, to whom a wild goose chase bears any implication of sport, yet the phrase derives from a sport hazardous, indeed. It is said to have begun in Ireland, where a chosen leader took mounted men cross country, but chose always the roughest, wildest going to be found. If mischance befell the leader some other took up the office—occasionally there was a change of leaders if the first proved timorous. For danger real and thrilling was the spice of the wild goose chase.

The winner was not he who came home first, but he who had flunked nothing in the route, even possibly having gone further around to negotiate an extra hazard.

Knowing this I have wondered a little if the Wild Geese—the Irish legions who, fighting for alien kings, have shown themselves prodigies of valor—did not take their name from the sport nearest the heart of their homeland.—New York Herald.

DISPLAY THAT IS PERIODIC

"Aurora Borealis" Has Its Manifestations at Intervals of From Ten to Sixty Years.

The name "aurora borealis" was first used by Cassini, who in 1621 observed one in France and wrote a description of it. The "aurora" is periodic in its manifestations, the finest displays being at intervals of 60 years and less marked ones at intervals of 10 or 11 years.

It is asserted that the greater and lesser displays correspond with the

The local teachers institute will be held at the high school Saturday of this week from 11 to 2:30 o'clock. Mr. Voelker will have charge of this institute, and it is expected that all the grade teachers from the west end of the county will attend.

The high school is planning on holding a pep meeting down town Friday noon to interest the people in the basketball games with Pilot Rock.

The monthly Student body meeting was held Monday morning.

A number of high school students were entertained Friday evening at the home of Phyllis Dyer.

Irma Buchner entered high school Monday morning as a Sophomore, coming from the Ashland high school.

Friday noon the school enjoyed a very interesting weekly news reel.

Last Thursday morning all the students of the high school took a standard intelligence test given in schools all over the country. This test is for knowledge, quickness and accuracy.

Grade News. Last Friday morning the eighth grade students tested milk from a number of cows.

Howard Reid has the highest ranking for his age in the recent intelligence test.

increase and decrease of spots on the sun.

This phenomenon is generally manifested in the following way:

A dim light appears on the horizon shortly after twilight and gradually assumes the shape of an arch having a pale yellow color with its concave side turned earthward. From this arch streams of light shoot forth, passing from yellow to green and then to brilliant violet.

The name, "aurora borealis," while generally referring to the northern lights, is applied to a similar phenomenon visible in the vicinity of the South pole.

Machine Clears Land for Farm.

Among the new agricultural machinery is a ponderous mechanical construction which moves under its own power over some rough country and leaves it in condition for planting. The operation of clearing land for agricultural purposes is a very hard and tedious operation, but with the aid of this new machine the labor and time expenditure is reduced more than half. The front end of the machine, which moves on a caterpillar tread, is equipped with heavy bars with sharpened points which enter the ground alternately and tear roots and throw them on a conveyor belt, dropping them inside to be disposed of later. The rear of the machine is supplied with a somewhat different device which pulverizes the ground and leaves it in condition for planting. Under ordinary conditions this machine has a capacity of three acres a day.

Beware of Apologizing.

Apologizing—a very desperate habit—one that is rarely cured. Apologizing is only egotism wrong side out. Nine times out of ten the first thing a man's companion knows of his shortcomings is from his apology.—Oliver Wendell Holmes.

Faulty Arrangement.

In some countries only fat women are considered beautiful, but they are poor countries even for fat women.—Exchange.
