**Exams This Week**

The Semester examinations started Tuesday morning in the high school, and the students have been appearing with worried looks on their faces since that time.

**PENDLETON BASE BALL FANS AND PLAYERS HOLD MEETING**

A meeting of base ball fans and players was held in Pendleton last Monday night.

Forming of a new league was one of the many discussions which came before the meeting.

The following is quoted from the Pendleton Tribune of Tuesday, Jan. 16:

"Sentiment was unanimous in favor of a six-team league, the Blue Mountain league of four teams, of last year not being favored for another season. It is desired to organize two teams in the west end of the county, such as Umatilla-Hermiston and Stanfield-Echo, to form two of the six-team league. With Pendleton for the third and Milton-Freewater for the fourth team, it would seem possible that Walla Walla and Dayton would form the other two members of a six-team league. More games and a greater variety of base ball would be the result, in the opinion of followers of the sport in this section."

In an interview with Henry Hill, manager of the local team, we are notified that this would be impossible as the traveling expenses would be too great from here to Walla Walla and Dayton, but thought that they would favor a league made up of teams closer to home.

**CRANKS FLOOD LEAGUE**

Show Curious Interest in Operations at Geneva.

Americans Lead in Bombarding Secretariat of League of Nations With All Kinds of Impossible Propositions.

Geneva.—The general offices of the League of Nations receive daily an enormous number of letters from all over the world. The mail clerks are busy individuals, for theirs is the duty of sorting and redirecting.

Countries outside the league produce the largest number of correspondents. The United States is far in the lead, and the cranks in America who feel called on to tell the league what it should do are seemingly without number. But Germany and Soviet Russia also aid generously in keeping the mail clerks occupied.

Africans and Asiatics, as well as Europeans and Americans, find the most extraordinary excuses for communicating with the league, showing there is a world-wide misconception as to what the league is, and what it was set up to do.

The secretariat gets a vast amount of mail matter that ought to go to the foreign offices of different governments, and it receives also a greater number of suggestions, applications and petitions that ought to go nowhere. Men and women bring to the league in all languages of the world, their heartaches, their headaches and the aching voids in their pocketbooks. The secretariat is asked for the addresses of reliable doctors; begged to find lost husbands and appealed to to settle domestic as well as other quarrels. The requests for funds come along in a steady stream. The league has not even been immune from the bugleblows of the confidence men, several Americans of this species having tried to use the secretariat to help them out with their passport troubles.

Among the most frequent appeals are these: That the league make the world bone dry; that it suppress tobacco as well as all drugs and drinks; that it institute a universal religion; that it reform the calendar; that it institute a universal language, and that it give votes to women the world over.

The suggestions are mostly for the cure of the world's economic and financial ills, but some correspondents want to show the league how universal peace can be restored through the general adoption of their particular religion, want to design a new world flag, or make the league all over again after their fashion.

The league is often asked to settle strikes and also to pacify divided families.

The latest curious demand was from a romancer who wanted material to write an exciting novel about the league; he was referred to the Near East section.
