"THE BEST OF GOOD SERVICE"

These Few Facts will Save You Time, Money and Disposition

A storage battery does not store electricity. It MAKES it by chemical reaction. This chemical reaction goes on, though slowly, when the battery is not in use.

Test the temperature by touching the top connectors. If they feel at all hot, run with your lights on for a time.

A WESTINGHOUSE BATTERY is one you can depend on. We have the Westinghouse agency and are properly equipped to give you service.
