

Some Livestock on Every Farm

SPECIALIZED grain and hay farming without livestock to consume the surplus is like raising livestock without growing any of the feeds which will reduce the cost of producing the animals.

Similarly, milk products are more profitable than producing cattle for slaughter, for it is the output of dairy products in one year is greater in dollars and cents than the total slaughtered worth of all the cattle in the country.

WHERE ALL THE SUGAR GOES

Bakers and Makers of Candy and Soft Drinks Use Vast Amounts of It.

Not more than half of the sugar we Americans consume is used in our homes. The rest goes into manufactured products. The estimates of the quantities used in manufacture run this way:

Our candy makers alone use more than 350,000 tons, and 130,000 tons more go to sweeten up chocolates and ice cream.

Every year the bakers dip into the national sugar bowl for well over 45,000 tons for bread, 55,000 tons for crackers and 90,000 tons goes every year into frostings and odds and ends in the bakeries.

Fourteen thousand or more soft-drink makers hit the nation's sugar bin for at least 130,000 tons for their concoctions and another 100,000 tons goes into condensed milk.

Twenty thousand tons of sugar is chewed up each year in gum; and less aesthetic jaws worked on another 15,000 tons that goes into the nation's "eat-in" tobacco, this not including about 6,000 tons that goes to smoking tobaccos.

The country's pill and potion bill disposes of about 6,000 tons of sugar each year, and the corner druggist uses an unknown quantity in filling what the doctor ordered.

Even sticky fly paper and roach, ant and rat killers draw from the sugar supply to the tune of hundreds of tons.

And nobody knows how much has gone into bootleg and home-brew—Nation's Business.

SCALING SHIPS BY MACHINERY

Labor-Saving Device for Cleaning Bottoms of Vessels is Run by Compressed Air.

Scaling ships' bottoms by machinery is the latest labor-saving practice devised to aid "those who go down to the sea in ships." Ever since the advent of iron and steel hulls, one of the meanest jobs faced by Jack is cleaning the vessel's underwater section when the ship is placed in dry dock. Hammers with chisel-like heads, wire brushes and even cold chisels have been laboriously wielded to clean off marine growths, rust and the old paint.

Now comes the ship scaling machine run by compressed air and looking very much like the pneumatic riveters so familiar to New Yorkers who live near modern building operations—and who doesn't? By its use, one man with a scaling machine can do as much in a day as could six men with the old-time methods and do a better and cleaner job at that. Goggles are needed, however, in operating the ship scaler, because it works so fast, that bits of metal, rust and paint fly about in a veritable shower. Another modification of the machine is run by electricity.

Voice Pictures. So that future generations might be able to compare the quality of her song with that of voices yet unheard, Melba consented to sing into Professor Low's audiometer, an instrument which photographs the waves of sound as they come from the singer's lips. This photograph is quite different from that of any other voice ever recorded. No other has had anything resembling the same variation combined with the same regularity. It is full of harmonics and infinitesimal variations in the wave, but these waves are perfect in regularity. This might account for its carrying power, by superimposition, since it is not a loud voice in the ordinary sense.

Heroic Act of Collie. A collie dog is reported to have saved the life of a London (Ont.) girl, while accompanying the child to a nearby store. The girl stopped on the railroad tracks in the path of a fier. Realizing the child's peril, the dog threw himself against her with sufficient impact to knock her clear of danger, and was cut to pieces by the train before he could regain safety. The little one's mother had tried to discourage the dog from going when the daughter started on her errand.

UMATILLA RAPID TRANSIT CO.

Operating Stages Between Pendleton and Umatilla

Pell & Smith, Umatilla, Oregon. Schedule Effective June 1, 1923

Table with columns for destination (Pendleton, Echo, Stanfield, Hermiston, Ar. Umatilla) and departure times for various routes.

Sunday Schedule. Leave Umatilla, 9:00 A. M. Leave Pendleton, 5:00 P. M.

Table with columns for destination (Umatilla to Pendleton, Hermiston to Pendleton, Stanfield to Pendleton, Echo to Pendleton) and fares.

The High School Mirror

Devoted to the Interest and Development of the Hermiston Schools. Vol. 2. No. 19

On Saturday, October 6, the Hermiston team experienced its first victory of the season by defeating Umatilla high school team 38 to 0. Although the players from Umatilla were no match for those of Hermiston, they gave the home players a good practice game.

Pendleton high school plays H. H. S. on the local field Saturday, Oct. 13 at 3 P. M. The Pendleton team appears much stronger than the squad of last year. Although the local team is light and inexperienced they mean to give Pendleton a hard game. Pendleton defeated Athena 26 to 0 Saturday. Last year Athena defeated Pendleton 7 to 3. From comparative scores Pendleton would seem to be about four touchdowns stronger than the locals.

The Senior Salamagundi given at the H. S. auditorium last Friday evening proved very successful. The program consisted of a short entertainment by members of the senior class; the first number was a piano solo followed by a shadow boxing match that threatened to bring down the house when the defeated member proceeded to jump up and knock the hero down. A short one-act playlette entitled "The Bachelor's Reverie" preceded a clarinet solo by Herbert Haneline, and this was followed by a short comedy depicting the H. S. girls' lunch. The closing number of the program was a peppy variety of good jokes and in which Edith Bensch played a prominent part. After this candy, ice cream, peanuts and punch were sold, and people were given an opportunity to visit the various side shows, including two fortune telling booths, a great swimming match, a famous oration and an excellent art exhibit and rogue's gallery. Although the program was short it was enjoyed by everyone. The class entertained a full house and took in about \$95. This means that the Seniors are now out of debt. "Aint it a grand and glorious feeling!"

The Sophomore class wishes to extend its thanks to all those who patronized the booth at the Dairy and Hog show, also to Mr. Mortimore for the delightful musical entertainment. The Sophomores netted \$16.50 from their sales at the booth.

Mr. Day announced Monday that Mr. Gulliford's room would be used as a reading and study room in the future. The reading table and rack have been moved to that room and will be supplied with magazines and papers brought by the students.

The fourth and fifth grades are moving to the basement of the Methodist church this week. The high school will use the two rooms that they leave vacant for recitation rooms. This change will make it possible for Mr. Gulliford to have a place to hold his public speaking classes.

Monday morning Earl Carson asked all the students to save their good snapshots for the Annual.

The Forum installed its officers at its last meeting. The club begins active work this week.

There will be a boys and girls glee club but it is not certain how many members there will be in each.

Susan Spencer, Violet Shaw and Lorena and Edward Ness have withdrawn from the Hermiston high to enter the Stanfield school.

Grade News. Louise Forrest from Yakima and Martin and Edith Kawa from Pendleton, entered the first grade.

Adelaide Kawa from Pendleton, has entered the seventh grade.

Mrs. Miller reports an attendance of 98.5 per cent in the fourth grade for the first month of school. Twenty pupils were neither tardy nor absent.

Mrs. King reports an attendance of 96.1 per cent for the first month of school with twenty-one neither absent nor tardy.

Shooting Cement. An 18-mile tunnel has been pierced to bring New York's water from the Catskills. Four hundred thousand barrels of cement will be used in lining the tunnel. A mixing plant at the mouth of each one of the seven shafts of the tunnel discharges compounded concrete down an eight-inch pipe at the rate of a mile a minute. The concrete is shot into steel forms by a "concrete cannon."

Frank About It. A visitor to a mountain village found a sect which believed that the world was flat and made that a tenet. "You hang together well," he suggested to an elder. "We don't always hang together so well at that," responded the elder frankly, "but we ain't got enough members for a split."—Louisville Courier-Journal.
