KINGSLEY'S INC.

HERMISTON'S HOUSE OF QUALITY AND SERVICE

PROPER HOUSING MEANS MORE PROFITS IN HOG RAISING

The Hog needs protection more than most domestic animals because it lacks natural protection, and is very susceptible to the influence of cold, heat and drafts.

Hog houses should have tight walls, roofs, doors and windows, abundant sunlight, well drained floors and plenty of fresh air without drafts. They should be strongly built of good materials.

Frame construction meets all these requirements and Tum-A-Lum is recommended because it is carefully and accurately made, is strong, durable, dependable and will give live, long honest service.

Picture of Hog House here shown is only one of the many properly designed styles that our architectural department has worked out.

Christian Science Services
The Christian Science services are held in rooms next to the Auditorium every Sunday at 11 o'clock. Sunday school at 10:15. All are cordially invited to attend.

"Why Worry"

SATURDAY AND SUNDAY

JANUARY 26 and 27

The High School Mirror

Dedicated to the Interest and Development of the Hermiston Schools

Vol. 2. No. 20

Last Friday evening our team met Athena on the home floor. Although our teams played excellent games they were outclassed by the visitors. The girls score was 21 to 14 and the boys 42 to 20. Both scores were in the visitor's favor. The girls lineup was: Arlousine Robinson, jumping center, Nancy McNaught, running center, forwards Isabel Dodd and Florence Woughter guards, Orvel Campbell, and Lenore Dyer. The boys lineup was: Kewpie Waterman, center, forwards Ernie Parrish and Herbert Haneline, and guards were Chester Rhodes and Lawrence Winslow. The teams are improving and showing well for the practice that they have had. They expect to meet Stanfield a week from Saturday night at the latter place.

The second semester has begun and all students are busy. To most of the students this means half of the school year gone, while to the seniors it means their last semester in the old Hermiston hi.

Those who left school this semester are: Richard Foreman, Orville Berry, Leon Norquist and Leroy Gulsinger.

Ben Whirry of McMinnville, gave a talk before the student body Tuesday morning. The subject of his talk was "Concentration and Continuation."

TWELFTH 300-EGG HEN JOINS O. A. C. FLOCKS

Latest Addition to Honor Class is Barred Rock M-506, Member of Noted Family of Layers.

The twelfth Oregon hen to make the 300-egg class in the agricultural college flocks dropped her magic number egg November 14, just one week ahead of the end of her first laying year. She is M-506, a barred rock from a family of noted layers.

"The achievement is not a freak but a logical result of breeding for increased production," says A. G. Lunn, head of the poultry department.

Her mother laid 600 eggs in the first three years, and her sire's mother 283 in the first year. She has but one full sister owned by the college, with a record of 236 eggs and three full weeks to go. Her granddam laid 303 eggs her first year.

M-506 was hatched March 14, 1922, and laid her first egg November 21, when 253 days old. Her eggs average 23 1-2 ounces to the dozen. Total egg production is more than three times the average annual production of the country.

The college experiment station is now working on the project of extending the profitable life of the layer. Renewal of the flock is a heavy cost in modern egg production. Hens are generally considered unprofitable after two full years of laying and are sent to the block.

The college has produced eight hens that averaged more than 1000 eggs in five years, and 34 that passed that mark in their natural lifetime. It has this stock to work on in breeding up a race of heavy long-distance layers.

Inez Hunt and Rita Loudermilk are back in school after a period of illness.

At a meeting of the student body Monday morning it was decided to have a high school party Friday night. It seems to be causing some excitement as it is a leap year party and the girls are supposed to do the inviting, but it appears they are doing their share.

Herbert Haneline, Lawrence Winslow, Chet Pelmulder, Dan Winesett and Shorty Longhorn came back to school Wednesday morning after a camping trip near Cold Springs.

Grade News
James Beys, Melvin Follet, Marjorie Redmond, Genevieve Ellis, all of the third grade, have returned to school after a siege of the measles.

In the eighth grade Harvey Adams, Francis Sales and Gerald McKenzie received highest semester grades and averages.

Miss Cowgill, assistant state club leader, was here Tuesday organizing sewing and cooking clubs from the sixth, seventh and eighth grade girls.

Mr. Campbell is kindly supplying each grade with a box of apples each week.

FARM REMINDERS

Bees do not hibernate in the winter but keep the temperature of the hive above 57 degrees by muscular activity. The colder it is outside the cluster of bees the warmer it is inside. As a result, when bees are not properly protected in the winter they consume an unnecessary amount of honey and waste a large amount of vitality. This activity also causes an excess of moisture in the hive.

Apple tree anthracnose have not made as much progress as usual this fall because of the unusually dry condition. The opinion of H. P. Bars, pathologist of the Oregon experiment station. Growers who have found the disease troublesome but who have not sprayed will find it profitable to put on a thorough coating of bordeaux mixture, 6-6-53, at once.

If honey combs are stored inside they should be fumigated with carbon bisulfide to prevent infestation by wax moths. Combs that are outside during the winter are not subject to wax moth attack. Carbon bisulfide is inflammable but it will not give good results where the temperature is below 60 degrees F. Sulfur fumes have proved effective in wax moth control.

Buy only the best bee supplies. This is especially important when purchasing hive bodies and frames. A metal covered telescope cover will be found far superior to any other particularly in the damper sections of the northwest. Order supplies early so as to have everything ready before the rush of spring work starts.

The New Touring Car

\$295

F.O.B. DETROIT

A Striking Value—at \$295

Considering the improved appearance of the new Ford Touring Car, one would naturally expect a proportionate advance in price.

Larger scale production, however, has made it possible to incorporate in this new type touring car a number of decided improvements without increasing its cost to the purchaser.

A comparison extending over a long period of years will reveal the fact that the present price is actually the lowest at which the five-passenger open car has ever been sold.

The Ford Touring Car stands today, as it always has, a most remarkable value in the motor car field.

This Car can be obtained through the Ford Weekly Purchase Plan
