

## Taking Big Chances

Do you know just what your chances are to accumulate enough money to protect you in old age?

Well, here are the chances, according to the statistics compiled by the insurance companies. They say that taking 100 men at the age of 25, all with an equal start, at death only one will leave wealth, only two will have accumulated a competency. Fifteen will leave between \$2,000 and \$10,000 and 82 leave—nothing. Moral, start a savings account right now.

—READ THE WANT ADS—

I wish to announce to my patrons that I will be in Hermiston June 1 to resume my practice.

Dr. W. W. ILLSLEY

### Warning Not Only in Eyes of Japanese

It has happened more than once that a Japanese baby has howled and shrieked in terror at the sight of a beautiful, fair-haired, blue-eyed girl.

This may strike you as comic or tragic, but it is a fact. Japanese standards of feminine beauty are different from ours.

A Japanese beauty must have straight, black hair. Should she have the misfortune to possess hair with the slightest tendency to wave, she will take endless trouble to straighten it out—as much trouble, in fact, as an American girl would take to produce the opposite effect.

Her face should be narrow and long; her forehead high and narrow at the middle, but wider and lower at the sides, so that it corresponds as nearly as possible to the outline of Fuji, the mountain beloved by Japanese artists.

Her eyes, of course, must be long and narrow, slanting upward at the corners; the eyebrows mere shadows, and high above the eyes; her complexion ivory-white with little or no color.

The Japanese girl carries her head and shoulders slightly forward, and inclines her body forward from the waist. She walks with short, quick steps, her toes turned in and her feet hardly lifted from the ground. To walk otherwise would be immodest!

### Heart Is Injured by America's Swift Pace

More deaths occur today in America from various diseases of the heart than from any other cause, says the New York Times. A few years ago tuberculosis headed the list, but while the number of deaths from this cause have been reduced, those from heart trouble of various kinds have increased.

The increase in the ravages of tuberculosis is explained by the great educational campaigns carried on throughout the country for combating the evil and to improved sanitary conditions.

The increase in heart troubles is attributed largely to the increasing pace of modern life in America. A decade ago the death rate from tuberculosis was 159.2 per 100,000. At that time the death rate from heart troubles was 140.8. A recent survey showed that while the rate for tuberculosis has been reduced to 114.2, that for heart disease has jumped to 141.9.

The highest fatality from heart disease has been found in Vermont, New Hampshire and Massachusetts in the order named. The lowest death rate is reported in Montana, Mississippi, Tennessee, Kentucky and Nebraska. It is increasing in New York.

### Clock Made Wholly of Glass Except Springs

A Bohemian glass polisher has performed a wonderful feat in the glass industry. He constructed a clock, which, with the exception of the springs, is made entirely of glass.

The glass plates and pillars of this extraordinary timepiece are bolted together with glass screws. The dial plate hands, shafts and cog wheels are all glass, and glass wedges and pins are used for fastening the various parts of the running gear.

All parts are ground to the average proportions of the metal parts of other clocks of the same size. The teeth of the cog wheels are cut with minute exactness, only the balance wheel being heavier and thicker than it is in an ordinary clock. The key with which the clock is wound is also of glass. Many of the parts had to be made over and over again before a clock that would go and keep time was produced.—The Pathfinder.

## ZEROLENE succeeds EASTERN and lubricates better

With the passing of the superstition that there is something mysteriously "better" about eastern oils, just because they cost more, Zerolene sales have increased seven-fold in the last seven years.

The following extract from a recent letter written us by the Citizens' Transfer & Storage Company of Tucson, Arizona, has some bearing on the reasons for this increase:

"Previous to using your Zerolene oils we experienced considerable trouble with eastern oils, which were much higher in price, and we found not suited to our use. We have used Zerolene oils and greases for the past five years. Our equipment (18 trucks and 2 passenger cars) is operated continuously throughout the year and the maintenance has been confined to keeping it supplied with the proper amount of oil and grease; bearings have required only reasonable adjustment after long intervals, and no replacements. We were well pleased with our recent quarterly check on the mechanical condition of our equipment, and knowing this condition to be maintained by the use of your oils and greases, we thought your company would be interested to know of our complete satisfaction."

### ZEROLENE F for FORDS

—the Standard Oil Company's new improved oil for Ford cars "Feeds Those Oil-Starved Fords."

This booklet reports independent service tests of Zerolene made by a number of large users. Ask any Standard Oil Company sales representative or Zerolene dealer for a copy.
