A STATEMENT

Pendleton, Ore., Oct. 2, 1924.

To the Editor:

In order that the taxpayers may know the amount of work accomplished by the present Sheriff of Umatilla county, I desire to submit the following figures:

Total number of prisoners in the county jail for four full years, 1917 to 1920, 549; total number of prisoners in county jail for three years and nine months during the present administration 1141. This means almost twice as many prisoners as there were during the term preceding mine. I have handled these prisoners without any increase of deputies but have used the same number that was used ten years ago.

Fines collected through the Sheriff's office during Houser administration amount to over \$18,300.00. These fines are nearly all for violation of the prohibition law. They are almost double any equal preceding period.

The taxpayers should understand that the Sheriff's office has collected in this money but does not spend it. Under the present law a part of it is used for the enforcement of the prohibition law. It is spent by other officers, not by the Sheriff. Much of the prohibition enforcement work done by the other officers during the last two years was made possible by the successful prohibition work done and by the fines collected through the Sheriff's office. The statement which has been made by some persons that "Houser does not do anything," is utterly false. It would be nearer the truth to say that "Houser has done everything that has been done," and this is so because the Sheriff's office has directly done more than any preceding administration and by means of fines collected has made it possible for other officers to carry on prohibition work.

The taxpayers should know that the Sheriff's duties have increased in almost every department. New forms and kinds of taxes must be collected. The safety of the highway, arrest of speeders, etc., has grown to be a constant problem. The Sheriff now handles automobile licenses. This requires much time. These matters together with court work, the increased number of prisoners, and the increased duties brought about by the enforcement of the prohibition law and general work, have practically doubled the work of the Sheriff's office since 1920. There is no increase in the number of regular deputies. Some special help has been employed in connection with the tax collections and office work. This is unavoidable and is done at the lowest cost consistent with good service.

I have made this good record by staying on the job almost twenty-four hours per day. No man can stay with the work more closely than I do. No Sheriff before has done so much work at so low a cost. No one else can do the work better for less money. No other person seeking the sheriff's office is in better touch with its problems than I am. I have not had the best support in law enforcement from some of the other officials but I have succeeded in spite of handicaps. Conditions in this regard are improving and will improve more in the future. I would be glad if all taxpayers could investigate the county records. Fair examination of the records make the extravagant claims of self-serving office seekers look foolish. With great confidence I make the claim that if re-elected, my next administration will be yet more satisfactory to the taxpayers and myself than the one which is about to end.

Very truly,

ZOETH HOUSER, SHERIFF.

**COLE'S ORIGINAL HOT
HEATERS**

*The Three Basic Principles in the
Construction of Cole's Original
Hot Blast Heaters*

First. The patented Air Tight construction giving perfect control over the fire, and preventing the escape up the chimney of heat and unburned fuel gases, giving perfect combustion of all the fuel.

Second. The all-steel sensitive radiating surface which radiates all the heat into the room and gives a sizzling heat.

Third. The patented Top Hot Blast Draft which oxidizes and turns into heat the valuable gas, half of the fuel, allowing nothing to waste.

These three basic principles entering into all Cole's Hot Blast Heaters make them world famous for fuel economy and perfect control and radiation of heat.

We now have a complete stock of Cole's Heaters and if you are in the market for a heater it will be to your advantage to investigate the merits of the Cole's Hot Blast before buying a cheaper Heater.
