## MAKE HENSLAY

Weather proof well ventilated poultry houses keep chickens healthy. A healthy chicken lays more eggs. So the surest way to increase your poultry profits is to provide proper shelter. Wood is the best material to use, for it is warm in winter, cool in summer and does not hold moisture long; and it is easy to work. Our plans are designed to give the most practical aid to the poultry raiser.

## FARMERS!!

Do you know that the latest statistics shows that 90 per cent of all the horses in the United States are over 12 years of age.

That all national authorities on the subject agree that within the next few years there will be the biggest shortage and the highest prices of horses ever known. All over the northwest they are now replacing the tractors with horses. Good horses have always been a fairly good price and are now going up by leaps and bounds. Why not be raising some good horses and have some to sell, or at least raise enough for your use and save buying?

There is nothing like looking ahead. We have a \$800.00 stallion.
