LOOK OUT FOR SELF POISONING

Neglect of the liver results in self poisoning! Not so quickly, perhaps, but just as surely as if you drank poison out of a bottle. If your liver is not doing its work of helping digestion, eliminating waste from the bowels and purifying the blood, you will always be troubled with sick headaches, nausea, biliousness, bad breath, gas, sour stomach or constipation.

Cleanse and tone your liver! Put your system in condition so you feel your very best again! Try just a spoonful of Dr. H. S. Thacher's excellent Liver and Blood Syrup after the next few meals and notice the quick improvement in the way you eat, sleep, look and feel—the return of strength, vigor and energy. You will be completely satisfied; otherwise there will be no cost.

FREE! This Coupon is Good for Sample Bottle

Dr. Thacher's Liver & Blood Syrup if presented before the supply for free distribution is already given away. Read the full details above, then act at once, as this offer is limited. Get a trial size now by presenting this coupon to Mitchell Drug Company.

Resin and Turpentine Put to Various Uses

Resin and turpentine have been produced on this continent since 1862. These commodities were gathered and exported by the early colonists. While they were originally used for caulking wooden vessels and protecting rope rigging, thus gaining their name of "naval stores," chemistry has developed many uses for resin and turpentine, making them indispensable in a large number of important industries, says the Montreal Star.

Soap manufacture leads in consumption of resin, with surfacing of writing and printing paper ranking second. Resin is also extensively used in the manufacture of varnishes, waterproofing compounds, roofing materials, leather dressings, lubricants, waxes, linoleum and electric insulation. Turpentine is an important industrial factor as a thinner for paint, solvent for inks, waxes, rubber and waterproofing compounds, as well as in chemical and pharmaceutical combinations.
