**Folly to Lose Heart**

*in Sight of Success*

One of the worst evils wrought by the sin of discouragement is that we are tempted to stop when we are just on the eve of realized success, and almost in sight of the richest blessings. Up near the summit of Mount Washington, I once saw a cairn of stones to mark the spot where a poor girl perished from exposure and heart failure on a cold night. Her father and she had rashly attempted to ascend the mountain without a guide (it was many years ago), and they had become lost, and had sat down bewildered when the chilling darkness of the autumnal night came on. The next morning the distracted father discovered that a very short distance more would have brought him in sight of the lights from the windows of the "Tip-top" cabin! Here is a bit of a parable to illustrate how those who are doing not rash things but wise things may be tempted to lose heart, and to relax their efforts when they were almost in sight of success.—Theodore L. Cuyler, D. D.

**Franklin's Idea Retained**

Of course you've heard the story about Benjamin Franklin munching a loaf of bread in the streets of Philadelphia, but do you know that that immortal character started a munching custom at the Pennsylvania hospital that has continued down to the present day and promises to last as long as the institution? In the early days of its existence the hospital had quite a struggle to get along. Franklin, always interested in its welfare, happened in one day and was told, among other things, that the young doctors were getting scarcely enough to eat. Touched by the tale, Franklin immediately visited a store and brought back a huge bag of ginger cookies. From that day to this a supply of ginger cookies has been on hand for the internes to munch between meals. They are kept in tin boxes, readily accessible to internes on night duty or others who are just naturally hungry most of the time.—Philadelphia Record.

**Cleaning Ornaments**

Bronzes and gilt ornaments can be cleaned only by brushing carefully with fine quality, small paint brushes. When too dull and shabby they must be done over by a professional. When the cheaper quality of gilt frames get shabby, take enough flour of sulphur to give a golden luster to a pint and a half of water and add four bruised onions. Boil 20 minutes, then strain and cool. Wipe the dust from the frame, and with a small, soft brush paint it over with the liquid, then set aside to dry. When dry it will look almost like new. The more expensive big frames must be regilded by a professional when very shabby, though they may be touched up once or more times with this liquid, which will help their appearance.

**Colorful Finnish Markets**

In brilliant shirt and smock the Finnish fishwife is the most vivid of the colorful throng at the daily market. While the Finns are fishing, the wives bring the catch to the market. It is especially exciting when the autumn sailing fleet comes in to sell provisions for the winter and again on the day when the ice breaks up in the spring and the first vessel of the year steams into the quays. The Helsingfors housewife usually comes to market and does her own purchasing of vegetables and meat and rarely leaves without the inevitable handful of bright, hardy flowers.

**Small Change**

A keen rider to hounds was out with a strange pack, and, owing to a series of mishaps, had got out of touch with the field. Jogging along a country lane he came to a child searching the ground carefully at the foot of a tall hedge.

"What are you doing there, my boy?" asked the sportsman, curiously. "Lookin' for small change, sir," grinned the lad. "The master always jumps higher than 'is 'orse at this 'edge."—Inverburgh Weekly Scotsman.

**NOTICE**

**To City Water Users**

All users of City Water whose bills are not paid by the 10th of the month for water used the previous month, will have their supply shut off with out notice and a charge of \$1.00 will be collected in addition to all arrears before water is again turned on.

BY ORDER OF THE CITY COUNCIL

**Youth Evidently Had**

*Read and Remembered*

The following anecdote, which is told about the English poet and essayist, Matthew Arnold, and his youthful son, shows that the mental quickness that manifested itself first in old Thomas Arnold, the headmaster of Rugby, had then in Matthew, the son, was transmitted unimpaired to the third generation.

Matthew Arnold's son once heard someone say that the moon was made of green cheese. Immediately he said: "I don't believe the moon is made of green cheese." When his father asked why he did not believe so, the boy could only repeat: "I don't know why, but I don't believe it."

Matthew Arnold told him he should not give opinions without having reasons for them. Young Arnold was chagrined and went away squelched—for the time being.

The next morning after greeting his father, he said: "Now I know why the moon is not made of green cheese. I found my reason in Genesis." "You have the advantage of me, then," conceded his father. "I didn't know the subject was mentioned in the Bible."

"Yes, it is," replied the boy. "It tells about the creation, and the moon was made before there were any cows!"—Youth's Companion.

**That Earth Is Round**

*Has Long Been Known*

Discovery at Oxford of a musty tome written a couple of centuries before Columbus' time, in which it is definitely stated the "urthe is round," will not surprise any person conversant with the subject. The assumption that the science of the Dark ages was sterile and entirely incorrect has always been gratuitous.

Knowledge, it is true, was not wide spread among the masses. Scientists were inclined to keep their discoveries more or less secret for several reasons. But it is certain that an exchange went on among the elect and it is presumable that Columbus had access to documents, information and maps which have since been lost.

Unscientific and uneducated persons, such as kings and queens and emperors, naturally would not have understood scientific proof any more than, say, the average politician today understands the proof of the Einstein "theory." The theory that the earth is round must have had quite a wide circulation long before Columbus set out to put it to practical use.—New York Evening Post.

**Famous English Library**

The Bodleian library is the public library of the University of Oxford, England. Its name derives from Sir Thomas Bodley, who restored it in 1598. Among other things he gave to the library a large and valuable collection of books purchased on the continent. The library occupies the site of the old University library, which was despoiled of its contents during the reign of Edward VI. By copyright law, a copy of every volume published in the United Kingdom is given to the library, which has from time to time been enriched by valuable collections of books and manuscripts. In the matter of rare books and manuscripts it is second only to the library of the Vatican, at Rome.—Kansas City Times.

**Dental Hygiene**

Among the occupations which have arisen in connection with the development of preventive medicine and public health work, that of the dental hygienist, oral hygienist, or dental nurse, as it has been variously called, is perhaps the most recent. Dental disease is the most common of all human ailments, and seems likely to remain so for some time to come. The public school offers an especially fine field of work for both prophylactic and educational work, and the dental hygienist is employed by the Department of Education in a considerable number of cities, towns and rural districts. Dental hygienists are well paid, considering the time spent in training. The salaries range from \$80 to \$200 a month.

**Odd Cause for Delay**

Two golfers playing an important tie were annoyed by a slow couple in front of them, obviously new to the game.

At one hole there was a particularly long wait. One of the offending couple dawdled on the fairway while his companion searched industriously in the rough.

At length the waiting couple on the tee could contain their impatience no longer.

"Why don't you help your friend to find his ball?" one shouted, indignantly.

The idle golfer in front turned with a cheerful smile.

"Oh, he's got his ball," he replied blandly. "He's looking for his club!"
