KINGSLEY'S
 HERMISTON'S HOUSE OF QUALITY AND SERVICE

A TIP CONCERNING YOUR CHICKEN HOUSE
 Anticipating chicken house business for the late summer and fall, we secured a complete stock of material for this business early in the spring. This stock has been in the yard for the last five months and is now thoroughly dry.
 This gives you a stock that will build an absolutely tight chicken house at the same price as green lumber would cost. You cannot afford to take a chance on using green lumber for a chicken house when we will guarantee the stock that we furnish not to shrink.

Which?
\$50 for Painting or **\$500 for Repairing**
A 1000 per cent Investment
 That's the way to look at painting—as an investment, not an expense. Look around you at the houses going to rack and ruin. What is doing it? The weather. There is only one defense against weather and that is paint. But paint, like weather, is of many kinds. Beware of the fair weather paint. It does not protect, it only deceives. Buy a paint that has proved its staying power.
 SWP (Sherwin-Williams House Paint, Prepared) has a fifty-year record. Its ingredients are what experience has proved to be most efficient in protecting property. It puts an armor between your buildings and the elements and also adds beauty and cleanliness.
