

A Happy Idea For You

YOU HAVE noticed, of course, that once folks buy a car they never do without again.

Now why?

Because they find that it's easier to own a car than they thought. They may put it off for years, as you have, thinking all the time that to buy entails sacrifice.

And then at last they make up their minds to try it, and they save in so many ways that to pay for the car is no trick at all. Ask any man who owns one.

We always try to arrange our terms so you can pay out of your present income. And a Ford car has helped many a man make more money.

If you haven't time to come down and talk with us about this, phone us. We'll send you all the facts and you can figure things out when you get around to it.

Poultry is an Important Part of the Grow-Your-Own-Living Farm Program

FARM POULTRY

PROVIDES GOOD FOOD FOR THE FAMILY. GIVES SOMETHING TO SELL EACH WEEK. FITS WITH DIVERSIFIED FARMING.

It is a Billion Dollar Cash Crop

The poultry census is taken only every 10 years. The last census showed there were in the United States 360,000,000 chickens. They produced 1,956,000,000 dozen eggs. The year's production of chickens and eggs brought \$1,048,000,000.

Ninety per cent of this billion dollars goes to farmers or rather to farmers' wives. These good wives spend it for groceries, clothing, lights, washing machines, rugs, pictures, books, phonographs. If we should take the poultry money out of a farm community, the country town merchants would wonder what had happened to their business.

Higher labor and feed prices, our newer knowledge of the factors making for economical and successful egg production, and an increasing demand for a standardized product on the part of the consumer are factors which are forcing many farm folks to make adjustments in their flocks. Farm poultry is fast getting down to a more business-like basis.

We have just received a number of booklets giving the results of several experiment stations and successful poultry men, of Hatching, Brooding, Culling and Feeding, as well as labor saving devices in the care of Chickens, Ducks, Geese and Turkeys. Copies may be obtained at the office.
