LITTLE DANGER

Reports from Pendleton, published and verbal, that there is some seepage through McKay dam should be taken for granted and not be cause for worry to local water users whose lands will be served by water from McKay reservoir.
Ralph Conner, government engineer who had charge of construction of the dam, felt confident it would not be 100 per cent tight. So did the government. It is just as certain that a gravel dam, faced with concrete, will permit of some seepage as that a business house extending credit will lose on some accounts. The structure of the dam was built with the idea that some water would seep through, and the fact that there is some seepage need cause no loss of sleep at this stage of the game.
Mrs. W. L. Hamm entertained Saturday afternoon in honor of her guest, Miss Alta Lillie of La Grande. Three tables of bridge were in play during the afternoon. Mrs. F. B. Swayze won first prize, and Miss Lillie the guest prize.
