It is Astonishing
—what an improvement can be made in a plain house by the magic of saw and hammer, boards and paint. The old house is transformed. A new porch—some better windows—a dormer or two and you would scarcely know the old house. The shifting of a partition—a new oak floor—built in kitchen cabinets or a window seat will often render the interior home more inviting and comfortable. A few hundred dollars spent for material in improving an old house frequently adds a thousand to its selling price. Come in and let us tell you how reasonable remodeling costs are just at this time.
