TESTS MADE IN SIXTH

In the recent examination conducted by the county health nurse, Miss Flannagan, the sixth grade ranged in height from 54 inches to 65 1-2 inches, and in weight from 66 pounds to 139 pounds. In project teaching the pupils of the sixth grade have written an illustrated history of Hermiston and are collecting real Indian stories of Umatilla county. Also, in reading, they are dramatizing parts of the Lewis and Clark expedition which the students find very interesting. Margaret Hedwall, Cecil Warner and Jack House have returned to school after several days absence.

THEFTS COMMITTED

A roll of two inch mesh poultry netting three feet wide was recently stolen from his place, according to a report made by W. Prizner. "Whoever took it must have known that the wire was there before he came after it because the roll was not in sight from the road," Mr. Prizner said. He also reported the loss of half a sack of corn in the granary.
