

Of Dobbin

O horse, you are a wonderful thing; no buttons to push, no horns to honk; you start yourself, no clutch to slip; no spark to miss, no gears to strip; no license-buying every year, with plates to screw on front and rear; no gas bills climbing up each day, stealing the joy of motoring away; no speed cops chugging in your rear, yelling summons in your ear. Your inner tubes are all O. K. and, bless your heart, they stay that way; your spark plugs never miss and fuss, your frame is good for many a mile; your body never changes style. Your wants are few and easy met; you've something on the auto yet.—American Forests and Forest Life.

For State Builders

They who preach patience to the peoples as the sole remedy for the ills by which they are oppressed, or who, while they admit the necessity of a contest, would yet leave the initiative to be taken by their rulers, do not, to my thinking, understand the state of things coming upon us. . . . It is not enough to precipitate a monarchy into a gulf; the gulf must be closed up, and a durable edifice erected on its site.—From "Faith and the Future," by Mazzini.

When Pasteurization Fails

The value of the pasteurization process as applied to milk has been questioned from time to time and it is undoubtedly true that for one reason or another, the operation does not always seem to be entirely satisfactory in the results. Somewhat recently it has been discovered that milk left uncooled between milking and pasteurization for a period of about four hours contains a large percentage of organisms that resist the pasteurizing process, while milk cooled and held to below 50 degrees Fahrenheit until it reaches the pasteurizer contains relatively few of these heat-resisting organisms.

Sun Dogs

"Sun dogs" are mock suns, appearing in the form of a bright light near the sun, usually tinged with the prismatic colors and sometimes having a luminous train. Two or more are generally seen at the same time in connection with solar halos. They are popularly called "sun dogs" because they are attendant on or followers of the sun. They are really optical illusions and are known scientifically as "parhelia." The images are due to the prismatic reflection of the rays of light through ice crystals formed in the upper atmosphere.

Nearly a Tragedy

His absent-mindedness had got him into such an unfortunate mix-up that he resolved to end it all. He carefully stuffed the keyhole, the window cracks, and then threw himself upon the bed. Next morning, when he did not appear for breakfast, they went upstairs and smashed the door. They found him snoring. He had forgotten to turn on the gas!

Us Girls

Bessie spent ten cents of her own money to take her brother to see a picture show. "Mamma," said she, "couldn't I take baby Jackie with me next time I go?" "Why, what do you want to take an eight-months-old baby to a motion picture for?" inquired her mother. "Well," said Bessie defensively, "if I've got to take him sometime, I'd rather take him now before he gets big and expensive."

The above is the trend of the market. We want poultry of all kinds; the price on turkeys will not be any higher this year than last and a good chance of a lower market as there are more birds. Ship me your poultry.

England Proposes to Ban Submarines.
Blackpool, England.—Great Britain proposed complete abolition of submarines in consulting with France regarding further naval armament limitation, Lord Cushendun, acting foreign secretary, revealed in an address here on the Anglo-French naval accord. However, as France would agree only to limitation of the larger ocean-going underwater vessels, this was accepted by Britain.
