SPREADER**

WITH BEATER ON THE AXLE AND
BOX-ROLL TURN

The only spreader of its type on the market with a low, easy loading box, combined with high drive wheels an important advantage made possible by two exclusive features—the beater on the axle and the box-roll turn. Unusually light draft—most owners use only two horses. The simplest spreader of its type—fewer chains, shafts, bearings—lasts longer—costs less for repairs.
