**HERMISTON BAKERY**

**Modernize Your Home**

On the left is the home of Mr. C. P. Conant, of Seattle. This home was well built, but out of style.

On the right is Mr. Conant's home, after he had it re-shingled with Western Red Cedar Shingles right over the old roof and side walls. The work was not at all expensive and the home is now in keeping with the modern houses which surround it.

**We'll Be Glad To Help You**

If your home is out of style, yet in a good neighborhood, don't sell it at a sacrifice—remodel it. You can lay Western Red Cedar Shingles over the old roof and sidewalls for very little more than the cost of repainting the building, and your upkeep will be much less. Reshingling, in this manner, cuts fuel bills too, because your outer walls and roof are double thick and hold heat that much better.

**Up-to-date in Style and Comfort**

Homes with Western Red Cedar Roofs and Side Walls are always in style and always good looking. Lay vertical grain Western Red Cedar Shingles with zinc-coated iron or copper nails and they will last a lifetime. Many beautiful color combinations are possible, if you wish to have your shingles stained. And these stained colors are permanent.

**Cheaper to Heat Than Before**

Your saving in fuel alone will help pay for a large share of the cost of reshingling your home over the old roofing and side walls. You will be pleasantly surprised by the moderate cost of bringing your home up to date with Western Red Cedar Shingles. We carry complete stocks, both in natural colors and stained to suit your individual taste.

*Profit by Our Suggestion*

FREE PLAN SERVICE

**Lest You Forget**

We are still ready and willing to save you at least 10 per cent on your gross monthly purchases. Is this worth while? No baits are offered. This saving is in all the items that make up your monthly living expenses.

The only requirement to make this saving is to pay cash and take your purchases with you. This is where the cost of selling mounts up.

You must pay for losses in bad accounts and bookkeeping expense and delivery service. No doubt about this. If not the merchant or distributor must go broke. We know, we have tried it. Think it over.

**Which, on your farm--**

**Manure on the fields or in the pile?**

Barnyard manure in the pile is like gold buried in a tin can, it does no good until it is put to good use. Worse than that, the heavy rains come and wash the valuable fertility away to the streams and your soil is robbed of the crop-building strength it is entitled to.

As we drive over the countryside, rendering farm equipment service, we still see manure piles of long standing. If you are not making use of your barnyard manure, take this suggestion to heart. Before another crop goes into the ground, build up the soil with the life-giving fertility that lies in the manure piles.

We can help you make an easy job of the spreading. The McCormick-Deering Manure Spreader on display at our store is low to the ground, durably built, light in draft, and efficient in operation. We would welcome an opportunity to explain every part and feature and to discuss soil fertility with you.
