CIRCUS THE 15TH

July 15th is the date set for the Al G. Barnes circus at Pendleton. Naturally we all want to go to the circus, but first, we are wondering what the attitude of the Pendleton councilmen, the fire department and others that govern our metropolis is toward letting the circus have water to dampen their grounds and settle the dust? Well we remember the last circus at Pendleton when we tried to see the animals but the dust was too thick to allow us to open our eyes, and we had to keep a handkerchief over our nostrils in order to breathe, all because some of the fire department boys did not get a pass, or possibly it was the mayor who was slighted. Sure we want to attend the circus, but first we would like to know if this show will be dust free. We are used to dust here, but it is well irrigated dust.

PLEASE LOOK IT OVER

Most reclamation projects depend largely on the kind of people who settle them," says Secretary of the Interior Wilbur. For the information of the secretary it may be well to mention that horse sense when displayed by the bureau of reclamation may also be helpful. In the case of the Stanfield district the government has built an excellent reservoir at cost of \$2,500,000 but has not yet provided for rehabilitation of the ditch system so the settlers can go ahead. They are fine settlers and have strong staying powers but for many months past they have been in the position of not knowing whether they are coming or going. There is nothing wrong with the attitude of the settlers and the productivity of the project is unquestioned. If the government would stop fiddling and stop expediting and get down to a common sense basis of action the project would do well.

If Dr. Wilbur has any misgivings see the animals but the dust was too thick to allow us to see conditions for himself.

Our idea of the best known fly trap in the world—a pot of Chili con carne at an open faced California "hot dog" joint.

The big question today is—"Have you any social prestige." "Not a drop."

Thanks to the increased transportation facilities to carry the "belly achers" far, far away.
