Burk's For Bargains.

Crowded Village
So many places claim to be the smallest village or parish in England that it is difficult to make a choice, but Northolme, near Wainfleet, with an area of only 25 acres and 20 perches, and a population of about 200, must at least be the most populous for its tiny size.

CHURCH NEWS

CHRISTIAN SCIENCE CHURCHES

"Love" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, February 2.

The Golden Text was, "The Lord will command his loving kindness in the daytime, and in the night his song shall be with me, and my prayer unto the God of my life" (Psalms 42:8).

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "One thing have I desired of the Lord, that will I seek after; that I may dwell in the house of the Lord all the days of my life, to behold the beauty of the Lord, and to enquire in his temple" (Psalms 27:4).

The Lesson-Sermon also included the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures", by Mary Baker Eddy: "When we fully understand our relation to the Divine, we can have no other Mind but His, no other Love, wisdom, or Truth, no other sense of Life, and no consciousness of the existence of matter or error" (p. 205-206).

Seventh Day Adventist Church

There will be regular services at the usual hours Sabbath, February 8. At 10 o'clock the Sabbath school will convene with classes for all ages. The subjects studied are as follows: Children's division, "The Temptation of Jesus"; young people and adults division, "The Experience of the Children of Israel immediately After Entering the Promised Land"; Bible study at 11 by the local elder.

A Bible Study League is being formed to meet regularly each week

for the purpose of becoming better acquainted with the word of the Lord and a standard text will be used in each class. We invite the public to any and all of these studies and we are sure that you will be glad that you attended. The hour of these meetings will be announced in the next issue of the Herald. You are invited to all of our services. Corlis Hotel building.

Baptist-Christian Church

Bible school is gradually on the increase since the storm and we are glad. We hope the attendance will soon reach that of the past month. May every boy and girl, man and woman feel it is their privilege to come and study God's warnings and promises next Sunday morning.

The message of the morning will be "The Gifts of God's Righteousness." Since man had no righteousness God provided one for him and gave it to him. This righteousness is Christ.

Christian Endeavor is at 6:30 P. M. Evening message will be on "Patching Old Clothes." Evangelism study and prayer on Thursday night at 7:30.

Rom. 3:21-22. But now a righteousness of God without the law is manifested, being witnessed by the law and the prophets; even the righteousness of God which is by faith of Jesus Christ unto all and upon all them that believe.

Methodist Church

Winter is over and spring is ap-

proaching and we are all rejoicing in the fact. The Methodist church extends to you a cordial invitation to join it in next Sunday morning's services in showing our appreciation by giving one or two hours to the worship of the Lord, the Giver of Spring. Sunday school at 10 A. M. and preaching services at 11 A. M. The Epworth League will meet at 6:30 P. M. There will be no evening service here. The evening worship service will be held in Echo. O. W. Payne, Pastor.

HERMISTON MEDICAL HOSPITAL NOTES

F. Caldwell of Irrigon is the first patient at the Hermiston medical and surgical hospital opened recently under the supervision of Miss Bertha Hanks, R. N. Mr. Caldwell was brought to the hospital with pneumonia. He is reported as doing well.

The hospital is situated in the Waterman home, just one block from the center of town. The hospital is now undergoing considerable re-arranging. In one or two weeks a grand opening is planned in which everyone will be invited to go thru the hospital.

W. G. Webber, 18 cows, 302.4 pounds butterfat.

Ingard Skovbo, 10 cows, 300.5 pounds butterfat.

The Umatilla Dairy Improvement association was organized in December, 1927. With this organization of 52 dairymen it became one of several 100 such associations in the United States working for the betterment of the dairy industry. The improvement association or cow testing association as it is more commonly called is designed to pierce the darkness that prevails so generally regarding the production of our dairy cows. Production and feed record costs stand out clearly and only the cow with scant production need fear them. The record of a large producer makes her value known and gives her the place in the herd to which she is entitled. As the year rolls around this cow may become the mother of a string of high producers and she may remain for many years the honored member of the herd—honored because profitable. As con-

ducted in this county the cow testing association is an organization of 54 dairymen who co-operatively employ a tester to keep production, feed, their income on their dairy cows known. With the actual production of his cows the dairyman can with certainty eliminate the unprofitable ones and feed the remainder according to known production. The most useful cow testing association also compares the records of dams and daughters, promotes the use of better sires and shows the advantage of feeding satisfactory rations. Records kept in this association are proving more valuable each year to the Hermiston Jersey Breeders association in determining the value of different sires used. Records kept on the cows will add several dollars to the price received for offspring when sold. To get anything out of cow testing work the dairyman must make use of the information gotten by a careful study of the records. From his knowledge of records of dams and daughters he can determine definitely what progress his herd is making due to breeding. From his knowledge of production and feed cost records he can eliminate all cows that do not produce a profit and can feed the remainder according to their production. As the years pass he can eliminate all those who do not yield a good profit and can gradually build up a high producing herd.
