

### Poultrymen To meet July 23 & 24th At Oregon State College

A new demonstration poultry plant, modern in every way, has just been completed at Oregon State college and is ready for the inspection of the several hundred poultrymen who will gather on the campus July 23 and 24 for the eighth annual Oregon Poultrymen's convention. In addition to this feature and a large number of exhibits and demonstrations, a full program of discussions of practical poultry problems has been prepared for the visitors.

Among the exhibits and demonstrations will be new battery brooders, all kinds of electrical poultry equipment, a miniature of a model 10-acre poultry farm, methods of handling various diseases, and a culling demonstration illustrating the good and poor types of birds and their characteristics. Some of the special demonstrations will include branding of birds by the new tattoo method, weed killing under wire screens and caponizing.

Besides the new plant, visitors will be shown a new building, also just completed, which will be used as a laboratory for studying poultry diseases with large numbers of birds. Following is the condensed program for the two days:

Wednesday—"Modern Trends in Poultry Farming," H. E. Cosby; "Sending Specimens to the Laboratory," E. M. Dickinson; "Alfalfa on the Poultry Farm," C. R. Briggs, Ben-

ton County Agent; "At What Age Should Chicks First be Fed," F. E. Fox; "Feeding Problems," R. B. Thompson, Stillwater, Okla.; "Electrical Appliances for the Poultry Farm," F. E. Price; "Banking Policy Toward the Poultry Farmer," Eugene Courtney, Woodburn; Annual meeting Poultrymen's association; variety program by Corvallis Chamber of Commerce; "Modern Poultry Developments," R. B. Thompson.

Thursday—Caponizing demonstration, F. E. Fox; "Some Poultry Breeding Methods," F. L. Knowlton; Question Box Hour; "Advertising Problems," Charles D. Byrne; "Obligation of the Hatchery Men," H. E. Cosby; Business session; "Bleeding, Testing and Autopsy of Hens to Determine Pullorum Infection," Dr. W. T. Johnson in charge.

Leav's for Bellingham. Mrs. E. W. West and daughter, Rosemary, left Sunday for Bellingham, Washington, where she will visit relatives and friends.

#### UMATILLA ITEMS

Mr. and Mrs. Basil Hickman and family left last week for La Grande where they will make their home. Mr. and Mrs. Fred Knudsen are visiting in the east.

Verna Byrnes spent a few days last week in Portland. Mrs. Al Poorg and Mrs. H. Gramer spent Thursday visiting with Mrs. Butterwood in Spokane.

Mr. and Mrs. Walter Bullard were chivared Friday evening immediately after they returned home. Mrs. Fred Hanson and son Wilbur spent this last week in Walla Walla.

Mrs. D. C. Mahoney spent Friday and Saturday in Spokane. Her son, Donald, who has been attending school there, returned home with her Saturday night.

Miss Rose O'Donnell is visiting at the home of her mother, Mrs. Tom O'Donnell.

Mrs. H. C. Bramer visited her husband in The Dalles Saturday.

Paul Walsh and Dwight Mahoney enjoyed a show in Pendleton Saturday night.

Miss Sara Rix moved into the Benjamin house Saturday.

Marian Springer has returned to her home from Corvallis where she has been attending school.

Mrs. Laura Todd attended the Moore family reunion in Walla Walla Sunday.

Mr. and Mrs. Baker of La Grande Sunday at the Neff home.

Clayton Buntin has returned to his home after a short visit with George Harvey in Portland.

George Butterwood returned to his home Sunday evening. He reports Mrs. Butterwood to be improving slowly.

Jim Cole accidentally fell Sunday night hurting his leg somewhat though not seriously.

#### AXIS TALKS

"Ah, maybe you didn't realize," said Axis, "that the world isn't all wrapped up in work and trade and lessons and good manners."

"No indeed! The world likes a game as well as any one. So the world, or earth, goes spinning. Every day it makes a complete spin and it spins right around on me."

"Think of the earth spinning, and think of me as the line going right through the center of the top of the earth upon which it is spinning."

"It's no small thought to think of the earth spinning," David said. It was the truth too, he thought, and also he felt that this speech would please Axis.

"You're right, boy, you're right," Axis said. "Well, the earth makes this complete spin once every twenty-four hours. Now when the earth is on one side there is day, and when it is on the other side it is night. Just as people get into the habit of sleeping on one side and never changing so the earth always turns from the west to the east and never changes this habit."

"All the morning it would turn you toward the sun, at noon you would pass the sun (you could bid it good-night if you wished) and in the afternoon turn you away from it."

"That's why the sun rises in the east and sets in the west," David exclaimed.

"Good boy, go to the head of the class," said Axis.

David didn't like that so much. This Living Map wasn't like a class. But evidently Axis didn't mean anything by it for he continued, in so friendly a way.

"It's the earth, you know, that moves and makes day and night—not the sun."

"I've never felt it moving," David said.

"Ah, that's because we're so good at the game. We've played it so long we're perfect. A part of the earth's surface must go a thousand miles every hour, but it goes very smoothly."

"And makes day and night," David said.

At one end of me is a line called North Pole and at the other end one called South Pole.

"Then there is one other grand annual trip."

"It's the earth turning upon me that makes one side have day while the other has night, and though the sun seems to set in the west it is in truth the earth's moving that causes this."

"What's the yearly trip?" David asked.

"Oh, yes, once a year the earth moves in a long pathway around the sun, just as I might move in a circle all around something that had fallen on the floor, though at the same time making my own little spin. The pathway of the earth is called the orbit—you would call it something fine like that too if you loved a favorite walk or path as we love ours."

"And my dear David, in some parts of the earth's orbit the lands that are north of your old friend Equator lean slightly toward the sun and so have spring and summer while the rest leaning away from the sun have autumn and winter."

"You seem to lean a little, Axis. Don't you stand up straight, either?"

"I like to lean a bit. They often call me the Leaning Axis. My parents never minded. They never said to me, 'Axis! Keep your shoulders back. You don't want to be round-shouldered.' They never said that to me."

"That seems funny," David murmured.

"I suppose it does to you," agreed Axis, "but not to me. Anyway I've given you enough of a spinning conversation and I must be back at the game. I have to see to it that day plays fair and that night plays fair, and it's almost time for night and the pageant. You're going?"

"Pageant?" asked David. "I didn't know about it."

"Oh, yes, there's going to be a pageant. Time is different in different places as you know. It's five hours later in London than in your part of the world—but the Magic Map people said that you could go from one country to another in a Map trip without bothering about their time." And he was given a treat of seeing a magnificent parade!

Progress! "Do you think the children are making progress in singing?"

"Rather! At first only the people next door complained, but now it is the whole neighborhood."—Lustig Maetter (Berlin).

Hermiston Tuesday on business connected with his office.

George Story, manager of the Shell Oil company of Pendleton, was in

Hermiston Visitors. Mrs. J. Cherry and Mrs. Milo Mc-

Farland of Umatilla were Hermiston visitors Tuesday.

## RELIABILITY ECONOMY GOOD PERFORMANCE

THE NEW FORD TUDOR SEDAN

YOU are buying proved performance when you buy a Ford. You know it has been built for many thousands of miles of satisfactory, economical service.

Letters from users in every part of the world show the value of the sound design of the car, good materials and accuracy in manufacturing. You sense a feeling of sincere pride in the oft-repeated phrase—"Let me tell you what my new Ford did."

Further tribute to the sturdiness, reliability and general all-round performance of the new Ford is shown in the repeated and growing purchases by government bureaus, by police departments, and by large industrial companies which keep careful day-by-day cost records. In most cases, the new Ford has been chosen only after exhaustive tests covering speed and power, safety, comfort, ease of control, oil and gas

consumption, low yearly depreciation, and low cost of up-keep.

They have found, as you will find, that the Ford embodies every feature you want or need in a motor car at an unusually low price.

#### NEW LOW FORD PRICES

Roadster	\$435
Phaeton	440
Tudor Sedan	495
Coupe	495
Sport Coupe	525
